This guide book contains What Is Data Science And Why Should You Learn It Using Python Can I Use Probability And Statistics To Help Me With Machine Learning Work With Numpy Work With Pandas Learning About Functions Identifying The Nearest Neighbors Learning About Functions Deep Learning Vs Machine Learning Applications Of Big Data Analysis And many more. Loops are going to be next on the list of topics we need to explore when we are working with Python. These are going to be a great way to clean up some of the code that you are working on so that you can add in a ton of information and processing in the code without having to go through the process of writing out all those lines of code. For example if you would like a program that would count out all of the numbers that go from one to one hundred you would not want to write out that many lines of code along the way. Or if you would like to create a program for doing a multiplication table this would take forever as well. But doing a loop can help to get all of this done in just a few lines of code saving you a lot of time and code writing in the process. Want to know more about this book Buy now
