Research Dept., 2019-04-09 After strong growth in 2017 and early 2018 global economic activity slowed notably in the second half of last year reflecting a confluence of factors affecting major economies China's growth declined following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States The euro area economy lost more momentum than expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards investment dropped in Italy as sovereign spreads widened and external demand especially from emerging Asia softened Elsewhere natural disasters hurt activity in Japan Trade tensions increasingly took a toll on business confidence and so financial market sentiment worsened with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year weighing

on global demand Conditions have eased in 2019 as the US Federal Reserve signaled a more accommodative monetary policy stance and markets became more optimistic about a US China trade deal but they remain slightly more restrictive than in the fall

*Reforming Agricultural Trade for Developing Countries* Alex F. McCalla, John D. Nash, 2006-11-09 In the ongoing Doha Development Round of World Trade Organization negotiations developing countries have had much greater leverage due at least in part to their large and growing share of world trade But will the increased influence of developing countries translate into a final agreement that is truly more development friendly What would be key ingredients in such a final outcome of the negotiations and what would the developing countries really get out of it This two volume set seeks to answer these questions This volume Volume 2 addresses the question of how a development friendly outcome to the talks would affect developing countries by quantifying the impact of multilateral trade reform It presents several different approaches to modeling the effects of the outcome of negotiations and then investigates why these and other modeling efforts produce such divergent results Volume 1 is issues oriented It takes up some key questions in the negotiations setting the stage with a historical overview of the Doha Development Agenda to help identify issues of most significance to developing countries and then explores select issues in greater depth Aimed at policymakers and stakeholders this two volume effort puts into the public domain important analytical work that will improve the chance for a pro development outcomes of the Doha round negotiations

Trade Liberalisation and Economic Development in Africa Gift Mugano, 2021-09-30 This book provides a thorough and rigorous discussion on the impact of trade liberalisation on economic development with a special focus on the African continent The author presents the rationale for trade liberalisation trade liberalisation frameworks the trade liberalisation economic development nexus impediments to trade and contemporary issues of international trade In this book notwithstanding the benefits from trade liberalisation the author shows that African trade as a share of global trade has remained flat at 3% as in 1975 while the continent s exports have remained raw materials and its intra regional trade at less than 15% of total trade which is the lowest in the world UNCTAD 2020 With respect to key economic development indicators such as economic growth poverty levels and

employment levels this book shows that ironically and in direct contrast with the conventional views that trade liberalisation alleviates poverty trade liberalisation in Africa has resulted in high levels of unemployment and low economic growth which ultimately lead to increased poverty In addition this book provides a detailed analysis of why trade liberalisation has failed to yield meaningful benefits to Africa The binding constraints and blockages which prevent positive spin offs on trade liberalisation in Africa are discussed in detail in this book In the same vein the author provides practical strategies which must be adopted by African countries in order to gain from trade liberalisation making this work a must read for African governments academia trade experts regional trading blocs the World Trade Organization and development partners In view of this and as part of the disruptive and structural transformation policies the author discusses case studies and international experience contextualised to Africa as well as strategies for addressing the trade related infrastructure gap production capacities export promotion and aid for trade
