- B. natural selection
- C. inheritance of acquired traits
- D. larger animals eating smaller animals

Ans: B. natural selection

A gene mutation in a certain flower allows the flower to produce more seeds. The seeds each have the same chance of producing a new plant as do seeds from flowers that do not possess this mutation. It can be expected that

- A. the mutated gene will become more common in the next generation of these flowers
- B. the mutation will kill the flowers that don't have the mutation
- C. the other plants in the area will develop the same mutation
- D. the seeds with the mutation will taste better to animals

Ans: A. the mutated gene will become more common in the next generation of these flowers

A population of people are isolated on an island, with no new immigrants over many generations. For this group, any new genetic variations are most likely to come from

- A. natural selection
