Section 17.1 Classification

In your textbook, read about how classification began and about biological classification.

For each item in Column A, write the letter of the matching item in Column B.

	Column A	Column B
_____	1. Grouping objects or information based on similarities	a. Aristotle
_____	2. Naming system that gives each organism a two-word name	b. Linnacus
_____	3. Developed the first system of classification	c. genus
_____	4. Branch of biology that groups and names organisms	d. classification
_____	5. Designed a system of classifying organisms based on their physical and structural similarities	e. taxonomy
_____	6. Consists of a group of similar species	f. binomial nomenclature

Determine if the statement is true. If it is not, rewrite the italicized part to make it true.

7. The scientific name of a species consists of a *family* name and a descriptive name.

8. The scientific name of modern humans is *Homo sapiens*.

9. *Latin* is the language of scientific names.

10. The *scientific* names of organisms can be misleading.

11. Taxonomists try to identify the *evolutionary relationships* among organisms.

12. Besides comparing the structures of organisms, taxonomists also compare the organisms' geographic distribution and *chemical makeup*.

13. Similarities between living species and extinct species *cannot* be used to determine their relationship to each other.

14. Because the bones of some dinosaurs have large internal spaces, some scientists think dinosaurs are more closely related to *amphibians* than to reptiles.

15. Classification can be useful in identifying the *characteristics* of an unknown organism.

Modern Biotechnology J. Tramper,Yang Zhu,2011-04-27 According to Greek mythology Pandora was sent down to earth upon the orders of Zeus She was given a mysterious box which she was not allowed to open However Pandora was very curious and when she arrived on earth she couldn t help taking a peek inside the box She saw that it was filled with gifts and calamities and to her astonishment they all escaped and spread throughout humanity with all the dire consequences thereof

Only hope was left at the bottom Figuratively speaking Pandora's box today represents a source of much suffering Is modern biotechnology just such a Pandora's box as the anti biotechnology lobby would have us believe Or can we selectively release the gifts and turn this new Pandora's box into a Panacea Modern biotechnology makes use of the recombinant DNA technology to genetically modify microorganisms plants and animals in order to make them more suitable for all kinds of applications such as cultivating food crops baking bread making wine antibiotics and hormones xenotransplantation and gene and stem cell therapy The book also particularly addresses the controversial aspects of these applications

Below-ground Interactions in Tropical Agroecosystems Meine van Noordwijk, Georg Cadisch, C. K. Ong, 2004 Below ground interactions are often seen as the dark side of agroecosystems especially when more than one crop is grown on the same piece of land at the same time this book aims to review the amount of light the past decade of research has shed on this topic It also aims to review how far we have come in unravelling the positive and negative aspects of these interactions and how in dialogue with farmers we can use the generic principles that are now emerging to look for site specific solutions

Biology: How Life Works (Volume 1) James Morris, 2013-01-04 Ordinarily textbooks are developed by first writing chapters then making decisions about art and images and finally once the book is complete assembling a test bank and ancillary media This process dramatically limits the integration across resources and reduces art media and assessments to ancillary material rather than essential resources for student learning Biology How Life Works is the first project to develop three pillars the text the visual program and the assessment at the same time All three pillars were developed in parallel to make sure that each idea is addressed in the most appropriate medium and to ensure authentic integration These three pillars are all tied to the same set of core concepts share a common language and use the same visual palette In this way the text visual program and assessments are integral parts of student learning rather than just accessories to the text
