women encounter the othering power of neoliberalism and confront inequalities of gender and class Within this context a critical comparison of socially similar women working either in export production industries or in small scale commerce and low level services in Ciudad Ju rez reveals how export factory work constrains women s empowerment at home as well as the wages they earn and the well being of their households This volume challenges the neoliberal rationale of empowering women to support market growth and argues instead for understanding women s empowerment as a process of transformation from disempowerment by gender power relations to challenging masculinist domination in households and ultimately the economy and society Because structures of gender and globalization are mutually constituted women s empowerment as gender democracy is integral to producing alternative democratic globalization Using a feminist methodology that gives attention to the standpoint of women located on the downside of social hierarchies and takes into account strategically diverse points of view this study develops analysis to counter neoliberal globalization as it touches down in the lives of ordinary women and men on the border and beyond International Business Christopher J.
