The Nimble Elephant John Giles,2012-08-01 Get it done well and get it done fast are twin apparently opposing demands Data architects are increasingly expected to deliver quality data models in challenging timeframes and agile developers are increasingly expected to ensure that their solutions can be easily integrated with the data assets of the overall organization If you need to deliver quality solutions despite exacting schedules The Nimble Elephant will help by describing proven techniques that leverage the libraries of published data model patterns to rapidly assemble extensible and robust designs The three sections in the book provide guidelines for applying the lessons to your own situation so that you can apply the techniques and patterns immediately to your current assignments The first section Foundations for Data Agility addresses some perceived aspects of friction between data and agile practitioners As a starting point for resolving the differences pattern levels of granularity are classified and their interdependencies exposed A context of various types of models is established e g conceptual logical physical and industry enterprise project and you will learn how to customize patterns within specific model types The second section Steps Towards Data Agility shares guidelines on generalizing and specializing with cautions on the dangers of going too far Creativity in using patterns beyond their intended purpose is encouraged The short term You Ain t Gonna Need It YAGNI philosophy of agile practitioners and the longer term strategic perspectives of architects are compared and evaluated Consideration is given to the potential of enterprise views contributing to project specific models Other topics include industry models iterative modeling creation of patterns when none exist and patterns for rules in data The section ends with a perspective on the modeler s possible role in agile projects followed by a case study The final section A Bridge to the Land of Object Orientation provides a pathway for re skilling traditional data modelers who want to expand their options by actively engaging with the ranks of object oriented

Data Modeling Master Class Training Manual Steve Hoberman, 2015-07

This is the sixth edition of the training manual for the Data Modeling Master Class that Steve Hoberman teaches onsite and through public classes. This text can be purchased prior to attending the Master Class; the latest course schedule and detailed description can be found on Steve Hoberman's website stevehoberman.com. The Master Class is a complete data modeling course containing three days of practical techniques for producing conceptual, logical, and physical relational and dimensional and NoSQL data models. After learning the styles and steps in capturing and modeling requirements, you will apply a best practices approach to building and validating data models through the Data Model Scorecard. You will know not just how to build a data model but how to build a data model well. Two case studies and many exercises reinforce the material and will enable you to apply these techniques in your current projects.

Top 10 Objectives

- 1 Explain data modeling components and identify them on your projects by following a question-driven approach.
- 2 Demonstrate reading a data model of any size and complexity with the same confidence as reading a book.
- 3 Validate any data model with key settings: scope, abstraction, timeframe, function, and format, as well as through the Data Model Scorecard.
- 4 Apply requirements elicitation techniques including interviewing, artifact analysis, prototyping, and job shadowing.
- 5 Build relational and dimensional conceptual and logical data models and know the tradeoffs on the physical side for both RDBMS and NoSQL solutions.
- 6 Practice finding structural soundness issues and standards violations.
- 7 Recognize when to use abstraction and where patterns and industry data models can give us a great head start.
- 8 Use a series of templates for capturing and validating requirements and for data profiling.
