Harness Production Cables Cable Processing Systems:

Optimal Flow Control in Manufacturing Systems O. Maimon, E. Khmelnitsky, K. Kogan, 2013-03-09 This book presents a unified optimal control approach to a large class of problems arising in the field of production planning and scheduling. It introduces a leading optimal flow control paradigm which results in efficient solutions for planning and scheduling problems. This book also introduces the reader to analytical and numerical methods of the maximum principle used here as a mathematical instrument in modeling and solving production planning and scheduling problems. The book examines control of production flows rather than sequencing of distinct jobs. Methodologically, this paradigm allows us to progress from initial assumptions about a manufacturing environment through mathematical models and construction of numerical methods up to practical applications which prove the relevance of the theory developed here to the real world. Given a manufacturing system, the goal is to control the production subject to given constraints in such a way that the demands are tracked as closely as possible. The book considers a wide variety of problems encountered in actual production planning and scheduling. Among the problems are production flow sequencing and timing, capacity expansion and deterioration, subcontracting and overtime. The last chapter is entirely devoted to applications of the theory to scheduling production flows in real life manufacturing systems. The enclosed disk provides software implementations of the developed methods with an easy, convenient user interface. We aimed this book at a student audience: final year undergraduates as well as master and Ph D.

Knowledge-Based Process Planning for Construction and Manufacturing Carlos Zozaya-Gorostiza, 2012-12-02 Knowledge Based Process Planning for Construction and Manufacturing describes a knowledge based system architecture that is used to develop process planning systems called PLANEX. This book explains that PLANEX is a domain independent knowledge based process planning system architecture. Starting from a description of the physical artifact to be constructed or manufactured, PLANEX generates the set of activities used to create the artifact. These activities with their required resources are linked into a process planning network which can be used in project scheduling or management. This text also reviews the concepts, requirements, and resulting architecture of PLANEX, including detailed descriptions of applications of the system in construction and manufacturing. This publication is recommended to engineers, architects, and specialists interested in construction and manufacturing process planning. *Computer Integrated Manufacturing* United States. Masterpieces of Swiss Entrepreneurship Jean-Pierre Jeannet, Thierry Volery, Heiko Bergmann, Cornelia Amstutz, 2021-04-21 This open access book focuses on Switzerland based medium sized companies with a longstanding export tradition and a proven dominance in global niche markets. Based upon in depth documentation and analysis of 36 Swiss companies over their entire history, an expert team of authors presents several parallels in the pathways and success factors which allowed these firms to become dominant and operate from a high cost location such as Switzerland. The book enhances these insights by providing detailed company profiles documenting the company history, development, and how their

relevant global niche positions were reached Readers will benefit from these profiles as they compile a diverse selection of industries mainly active within the B2B sector with mostly mature companies 60 years to older than 100 years since founding and different types of ownership structures including family firms Masterpieces of Swiss Entrepreneurship brings unique learning opportunities to owners and leaders of SMEs in Switzerland and elsewhere Findings are based on detailed bottom up research of 36 companies without any preconceived notions The book is both conceptual and practical It fosters understanding for different choices in development pathways and management practices Matti Alahuhta Chairman DevCo Partners ex CEO Kone Board member of several global listed companies Helsinki Finland Start up entrepreneurs need proven models from industry which demonstrate the various paths to success Masterpieces of Swiss Entrepreneurship provides deep insights highlighting these models and the important trade offs entrepreneurial teams must consider when choosing the path of high growth or of maximum control as they are often mutually exclusive Gina Domanig Managing Partner Emerald Technology Ventures Zurich
