years have witnessed the conferral of increasingly significant powers to these bodies to the point where the successful implementation of many of the EU's policies is now dependent upon the activities of EU agencies. While EU agencies have become indispensable in terms of their practical importance, the lack of a legal basis in the EU Treaties to establish and empower new bodies, as well as the lack of an adequate framework in secondary law, means that there exists little control over EU agencies. This results in critical issues such as the absence of clear criteria prescribing when an agency may be empowered to act and also the failure to consider the interests of the actors normally responsible for the implementation of EU law such as the Member States and the Commission. Providing the first comprehensive overview of the development of agencification in the EU, this book explores the question: What are the political and legal limits to EU agencification? Analysing EU agencies from an institutional and constitutional perspective, the book traces the development of EU agencies, explores the different tasks they perform, investigates the limits to agencification and discusses the legal basis for such agencies.

Teacher quality is widely reputed to be the key determinant of educational success for students. Teachers at the beginning of their career need support and guidance in providing a sustained high quality experience for their learners. The role of continuing professional development (CPD) is crucial in honing and refining the knowledge, understanding and skills of teachers. Effective CPD can also provide teachers with the self-efficacy needed, particularly when they start teaching, to stay in the profession. With teacher shortages reported across the globe and up to one third of teachers in England leaving the profession by their fifth year in teaching, CPD is an attractive solution to retain teachers. The Department for Education have established a mandatory CPD framework for all early career teachers (ECTs) teaching in schools in England. The Early Career Framework (ECF). Tanya Ovenden Hope, Editor, brings together insights from those most closely connected to the ECF: the training providers, school leaders and academics involved in understanding the efficacy of professional development and learning in schools. Ovenden Hope offers an historical record of the ECF, showing where it came from, what it offers now for schools and early career teachers (ECTs), and the challenges and opportunities for development in the future.
