National Security Council,2010-07-01 The architecture of the Nation s digital infrastructure based largely upon the Internet is not secure or resilient It s a horrifying wakeup call that bluntly opens this report on one of the most serious national security and economic threats the United States and indeed the world faces in the 21st century And it sets the stage for the national dialogue on cybersecurity it hopes to launch Prepared by the U S National Security Council which was founded by President Harry S Truman to advise the Oval Office on national security and foreign policy this official government account explores the vulnerabilities of the digital infrastructure of the United States what we can do to protect it against cybercrime and cyberterrorism how to protect civil liberties and personal privacy in cyberspace why a citizenry educated about and aware of cybersecurity risks is vital the shape of the public private partnership all these efforts will require Just as the United States took the lead in creating the open flexible structures of the early Internet it must now take the initiative in ensuring that our digital networks are as secure as they can be without stifling the unprecedented freedom of opportunity and access the information revolution has afforded us all This report is the roadmap for making that happen and it is required reading for anyone who works or plays in the 21st century digital world that is all of us   **Cybersecurity, Actions Needed to Strengthen U.S. Capabilities** United States. Government Accountability Office,2017-07-11 Cyber based intrusions and attacks on federal systems and systems supporting our nation s critical infrastructure such as communications and financial services are evolving and becoming more sophisticated GAO first designated information security as a government wide high risk area in 1997 This was expanded to include the protection of cyber critical infrastructure in 2003 and protecting the privacy of personally identifiable information in 2015 This statement 1 provides an overview of GAO s work related to cybersecurity of the federal government and the nation s critical infrastructure and 2 identifies areas of consistency between GAO recommendations and

those recently made by the Cybersecurity Commission and CSIS In preparing this statement GAO relied on previously published work and its review of the two recent reports issued by the Commission and CSIS *Cybersecurity* U S Government Accountability Offi Gao,2019-06-07 CYBERSECURITY Actions Needed to Strengthen U S Capabilities *U.S. Cyber Strategies* Maxine Newman,2015 The United States is committed to an open secure interoperable and reliable Internet that enables prosperity public safety and the free flow of commerce and ideas The Internet was not originally designed with security in mind but as an open system to allow scientists and researchers to send data to one another quickly Without strong investments in cybersecurity and cyber defenses data systems remain open and susceptible to rudimentary and dangerous forms of exploitation and attack Malicious actors use cyberspace to steal data and intellectual property for their own economic or political goals Governments companies and organisations must carefully prioritise the systems and data that they need to protect assess risks and hazards and make prudent investments in cybersecurity and cyber defense capabilities to achieve their security goals and objectives Behind these defense investments organisations of every kind must build business continuity plans and be ready to operate in a degraded cyber environment where access to networks and data is uncertain To mitigate risks in cyberspace requires a comprehensive strategy to counter and if necessary withstand disruptive and destructive attacks The United States Department of Defense DoD is responsible for defending the U S homeland and U S interests from attack including attacks that may occur in cyberspace This book examines the DoD s cyber security strategies provides US Cyber Command with strategic direction to ensure unity of effort as duties are performed in the service of the nation and discusses international strategies for cyberspace <u>Emerging Cyber Threats to the United States</u> Cybersecurity, Infrastructure Protection, and Security Technologies of the Committee on Homeland Security House of Representatives Subcommittee,2017-05-05 The United States faces evolving cybersecurity threats from nation states such as China Russia North Korea and Iran as well as cyber threats from criminal organizations and terrorist groups such as ISIS These actors continue to develop and build more sophisticated cyber capabilities These hackers now pose an even greater threat to the U S homeland and critical infrastructure Cybersecurity more than ever is National security In 2015 the U S was the victim of one of the most significant cyber attacks in its history The breach at the Office of Personnel Management exposed the personal and security clearance information of 21 5 million current and former Government employees In 2014 North Korea conducted a cyber attack on Sony Pictures that not only destroyed computers but also was intended to stifle free speech and threaten American ideals The Obama administration s lack of proportional responses to these cyber attacks has signaled to the world that there are no real consequences for such actions Without a comprehensive National cybersecurity strategy that establishes deterrence the future could bring an increasing number of adversaries that are willing to conduct cyber attacks against the United States <u>Federal Cybersecurity</u> United States. Congress. Senate. Committee on Government Operations. Permanent Subcommittee on Investigations,2019 Federal government agencies are the frequent

target of cybersecurity attacks No agency is immune to attack and the list of federal agencies compromised by hackers continues to grow The number of data breaches agencies have reported in recent years is not surprising given the current cybersecurity posture of the federal government This report documents the extent to which the federal government is the target of cybersecurity attacks how key federal agencies have failed to address vulnerabilities in their IT infrastructure and how these failures have left America s sensitive personal information unsafe and vulnerable to theft Protecting this information from cybersecurity attacks could not be more important <u>Examining the President's Cybersecurity Information-Sharing Proposal</u> United States. Congress. House. Committee on Homeland Security,2015-07-03 At the dawn of the digital age our Nation saw endless opportunities to generate prosperity by expanding our networks and connecting to the world But today American prosperity depends as much on defending those networks as it does on expanding them Every day our country faces digital intrusions from criminals activists terrorists and nation states like Russia China and Iran The impact of those intrusions are felt everywhere from our National security secrets to the personal information of Americans We cannot tolerate acts of cyber vandalism theft or cyber warfare especially when they put our Nation s critical infrastructure at risk and when they steal American intellectual property and innovations It is clear that safeguarding American cyber space is one of the great National security challenges of our time accordingly our Government must play a leading role in combating threats in the digital domain <u>The U.S. Cybersecurity and Intelligence Analysis Challenges</u> John Michael Weaver,2022 One of the prevailing issues regarding security to North America and more pointedly the United States gravitates on the topic of cyber threats confronting this nation These threats are becoming more disruptive and destructive and many nations infrastructure is vulnerable to them This book makes use of a qualitative research methodology looking at a conventional understanding of the four instruments of power that include diplomacy information military and economic D I M E efforts through the use of the York Intelligence Red Team Model Cyber Modified and seeing how adversaries are using them against the United States Moreover this project uses secondary data and makes use of the Federal Secondary Data Case Study Triangulation Model to ensure a balance of sources to dissect the problem John M Weaver is Associate Professor of Intelligence Analysis at York College of Pennsylvania the US **Securing America's Future** ,2012
