manufacturer bias The scope of engines covered includes general purpose engines found in heavy commercial vehicles railway locomotives and vehicles electrical generators prime movers and marine engines Such engines are technical precursors to automotive engines This book is for all who deal with engine failures those who work in repair shops shipyards engineering consultancies insurance companies and technical oversight organizations as well as R D departments at engine and component manufacturers Researchers academics and students will learn how even the theoretically impossible can and will happen

*Vehicular Engine Design* Kevin Hoag, Brian Dondlinger, 2015-08-04 This book provides an introduction to the design and mechanical development of reciprocating piston engines for vehicular applications Beginning from the determination of required displacement and performance coverage moves into engine configuration and architecture Critical layout dimensions and design trade offs are then presented for pistons crankshafts engine blocks camshafts valves and manifolds Coverage continues with material strength and casting process selection for the cylinder block and cylinder heads Each major engine component and sub system is then taken up in turn from lubrication system to cooling system to intake and exhaust systems to NVH For this second edition latest findings and design practices are included with the addition of over sixty new pictures and many new equations

**Engine Management** Greg Banish, 2011-04-01 Tuning engines can be a mysterious art all engines need a precise balance of fuel air and timing in order to reach their true performance potential Engine Management Advanced Tuning takes engine tuning techniques to the next level explaining how the EFI system determines engine operation and how the calibrator can change the controlling parameters to optimize actual engine performance It is the most advanced book on the market a must have for tuners and calibrators and a valuable resource for anyone who wants to make horsepower with a fuel injected electronically controlled engine
