Engineering Trivia Questions And Answers:

Advances in Open Domain Question Answering Tomek Strzalkowski, Sanda Harabagiu, 2006-10-07 Automated question answering the ability of a machine to answer questions simple or complex posed in ordinary human language is one of today's most exciting technological developments. It has all the markings of a disruptive technology, one that is poised to displace the existing search methods and establish new standards for user centered access to information. This book gives a comprehensive and detailed look at the current approaches to automated question answering. The level of presentation is suitable for newcomers to the field as well as for professionals wishing to study this area and/or to build practical QA systems. The book can serve as a how to handbook for IT practitioners and system developers. It can also be used to teach advanced graduate courses in Computer Science, Information Science and related disciplines. The readers will acquire in depth practical knowledge of this critical new technology.

Canadian Electronics Engineering, 1984 **DE/domestic Engineering**, 1986 *Excelsior, You Fathead!* Eugene B. Bergmann, 2005 Applause Books. Jean Shepherd 1921-1999 master humorist is best known for his creation A Christmas Story, the popular movie about the child who wants a BB gun for Christmas and nearly shoots his eye out. What else did Shepherd do? He is considered by many to be the Mark Twain and James Thurber of his day. For many thousands of fans for decades, Shep talked on the radio late at night, keeping them up way past their bedtimes. He entertained without a script, improvising like a jazz musician on any and every subject you can imagine. He invented and remains the master of talk radio. Shepherd perpetrated one of the great literary hoaxes of all time, promoting a nonexistent book and author and then brought the book into existence. He wrote 23 short stories for Playboy, four times winning their humor of the year award and also interviewed The Beatles for the magazine. He authored several popular books of humor and satire, created several television series and acted in several plays. He is the model for the character played by Jason Robards in the play and movie A Thousand Clowns, as well as the inspiration for the Shel Silverstein song made famous by Johnny Cash, A Boy Named Sue. Readers will learn the significance of innumerable Shepherd words and phrases such as Excelsior, you fathead, and observe his constant confrontations with the America he loved. They will get to know and understand this multitalented genius by peeking behind the wall he built for himself, a wall to hide a different and less agreeable persona. Through interviews with his friends, co-workers and creative associates such as musician David Amram, cartoonist and playwright Jules Feiffer, publisher and broadcaster Paul Krassner, and author Norman Mailer, the book explains a complex and unique genius of our time. Shepherd pretty much invented talk radio. What I got of him was a wonder at the world, one man could create. I am as awed now by his achievement as I was then. Richard Corliss, Time magazine online.
