in different sectors of the economy Appropriate Technologies for Environmental Protection in the Developing World Ernest K. Yanful, 2009-02-19 This book is the first edited compilation of selected refereed papers submitted to ERTEP 2007. The selected papers either dealt with technologies or scientific work and policy findings that address specific environmental problems affecting humanity in general but more specifically people and ecosystems in developing countries. It was not necessary for the work to have been done in a developing country but the findings and results must be appropriate or applicable to a developing country setting. It is acknowledged that environmental research technology applications and policy implementation have been demonstrated to improve environmental sustainability and protection in several developed economies. The main argument of the book is that similar gains can be achieved in developing economies and economies in transition. The book is organized into six chapters along some of the key themes discussed at the conference: Environmental Health Management, Sustainable Energy and Fuel, Water Treatment, Purification and Protection, Mining and Environment, Soil Stabilization and Environmental Monitoring. It is hoped that the contents of the book will provide an insight into some of the environmental and health management challenges confronting the developing world and the steps being taken to address them.

Abstracts on Tropical Agriculture, 1995 Functional Foods and their Implications for Health Promotion Ioannis Zabetakis, Ronan Lordan, Alexandros Tsoupras, Dipak Ramji, 2022-12-03 Functional Foods and Their Implications for Health Promotion presents functional foods from raw ingredients to the final product providing a detailed explanation on how these foods work and an overview of their impact on health. The book presents the functions of food against disease and discusses how healthier foods can be produced. Broken into four parts, the book presents a deep dive into plant-derived functional foods, dairy foods, marine food, and beverages. The book includes case studies, applications, literature reviews, and coverage of recent developments. Intended for nutritionists, dietitians, food technologists, as well as students and researchers working in nutrition, dietetics, and food science, this book is sure to be a welcomed resource. Uses flow diagrams to highlight the effects of processing on produced functional foods. Combines information on the production formulation of the food with data on bioactivities and bioavailability. Presents whole foods and not food components while also focusing on functionality and availability.
