Ross, 2007 Corporate Finance by Ross Westerfield Jaffe and Jordan was written to convey the most important corporate finance concepts and applications as a level that is approachable to the widest possible audience The concise format managerial context and design and student friendly writing style are key attributes in this text We took the best from RWJ Fundamentals and RWJ Corporate to create a book that fits an underserved need in the market RWJ Core Principles strikes a balance by introducing and covering the essentials while leaving more specialized topics to follow up courses This text distills the subject of corporate finance down to its core while also maintaining a deciding modern approach The well respected author team is known for their clear accessible presentation of material that makes this text an excellent teaching tool *Transfer Pricing Aspects of Intra-Group Financing* Raffaele Petruzzi, 2013-10-20 For corporate managers maximization of the profits and the market value of the firm is a prime objective The logical working out of this principle in multinational enterprises has led to

an intense focus on transfer pricing between related companies principally on account of the very attractive tax advantages made possible. Inevitably numerous countries have established transfer pricing legislation designed to combat the distortions and manipulations that are inherent in such transactions. This important book, one of the first in depth analysis of the current worldwide working of transfer pricing in intra group financing and its resonance in law, presents the relevant issues related to loans, financial guarantees and cash pooling, analyses an innovative possible approach to these issues and describes new methodologies that can be implemented in practice in order to make intra group financing more compliant with efficient corporate financing decisions and the generally accepted OECD arm's length principle. Comparing the tax measures implemented in the corporate tax law systems of forty countries, this study investigates such aspects of intra group financing as the following: corporate finance theories, studies and surveys regarding financing decisions, application of the arm's length principle to limit the deductibility of interest expenses, impact of the OECD's Base Erosion and Profit Shifting (BEPS) project, transfer pricing issues related to intra group financing, credit risk in corporate finance, rationales utilized by credit rating agencies and the assessment of arm's length nature of intra group financing. The author describes ways in which the application of the arm's length principle can be strengthened and how the related risk of distortion and manipulation can be minimized. The solutions and methodologies proposed are applicable to any business sector. Given that determination of the arm's length nature of transactions between related companies is one of the most difficult tasks currently faced by taxpayers and tax administrations around the world, this thorough assessment and analysis will prove extraordinarily useful for in house and advisory practitioners, corporate officers, academics, international organizations and government officials charged with finding effective responses to the serious issues raised. In addition to its well researched analysis, the book's comparative overview of how loans, financial guarantees and cash pooling are currently addressed by OECD Member States and by their national courts is of great practical value in business decision making.

Fundamentals of Investments Charles J. Corrado, Bradford D. Jordan, 2000. CD ROM contains Self study software, FinCalc software, an options calculator, PowerPoint version of lecture notes.
