Services and the Green Economy Andrew Jones, Patrik Ström, Brita Hermelin, Grete Rusten, 2016-05-04 Services and the Green Economy addresses a significant gap in the knowledge and understanding of sustainable economic development. Bringing together a range of expert contributions, the book analyses the role of services and service industries in the transition to a greener economy. Framed by an approach within environmental economic geography, chapters written by leading researchers from a range of disciplines explore how service industries, service firms and service activities are at heart of green economic processes. Adopting a global perspective, it includes research from the US, Europe, South America and Japan, providing a detailed insight into how the crucial role of service industry activity has often been ignored in current understandings of a green economic transition.

Manufacturing Servitization in the Asia-Pacific Jing Wang, Michitaka Kosaka, Ke Xing, 2015-10-24 This book systematically describes the development of manufacturing servitization in the Asia Pacific region. It offers a practical and theoretical reference guide to the manufacturing companies in the Asia Pacific region, which is now a major global manufacturing center. Servitization is a fairly recent trend in the manufacturing industry; some American and European manufacturing companies have successfully transformed to service-oriented manufacturing companies over the past three decades, while Asian Pacific region companies have only more recently begun to recognize the importance of servitization. But some Asia Pacific region companies have been exploring approaches in the same direction of servitization without being aware of the concept. One unique aspect of this book is the fact that it takes into consideration the social and cultural influences of this region. It introduces companies within and beyond the region, as well as the academic world, to the current state of development of the Asia Pacific manufacturing industry and its servitization trend. This is the first book that focuses on this topic, one which is of great theoretical and practical importance.
