The Publishers' Trade List Annual ,1985 American Book Publishing Record ,1978 **Build Your Own .NET**

Language and Compiler Edward G. Nilges, 2013-11-09 All software developers use languages which are the fundamental tool of the trade. Despite curiosity about how languages work, few developers actually understand how. Unfortunately, most texts on language and compiler development are hard to digest, written from academic platforms for use in college-level computer science programs. On the other hand, *Build Your Own NET Language and Compiler* demystifies compiler and language development and makes the subjects palatable for all programmers. This practical book presents techniques that you can apply to everyday work. You'll learn to add scripts and macro languages to your applications, add runtime expression evaluation to their applications, and generate code immediately. Further, you will learn parsing techniques which are essential to extract information from any structured form of data-like text files: user input, XML, or HTML. As a bonus, the book includes a complete QuickBasic-compatible compiler with source code that works. The compiler illustrates the book's techniques and acts as a versatile NET language.

Principles of Compiler Design Alfred V. Aho, 1986 **Compilers, Principles, Techniques, and Tools** Alfred V. Aho, Ravi Sethi, Jeffrey D. Ullman, 1986

This book provides the foundation for understanding the theory and practice of compilers. Revised and updated, it reflects the current state of compilation. Every chapter has been completely revised to reflect developments in software engineering, programming languages, and computer architecture that have occurred since 1986, when the last edition was published. The authors, recognizing that few readers will ever go on to construct a compiler, retain their focus on the broader set of problems faced in software design and software development. Computer scientists, developers, and aspiring students that want to learn how to build, maintain, and execute a compiler for a major programming language.
