Management, 2010 **How Does Absorptive Capacity Influence the Origin and Evolution of Dynamic Capabilities**, 2002 In this thesis I deploy a qualitative case study method to examine the influence of a firm's absorptive capacity of external knowledge on the origin and evolution of dynamic capabilities First I make an attempt to reduce some of the conceptual and definitional confusion in the dynamic capabilities literature by developing and then validating a conceptual framework for their study in the field Second to examine the underlying mechanisms leading to the origination and evolution of dynamic capabilities I call on recent literature on the absorptive capacity construct that calls for more understanding of how absorptive capacity can produce and develop dynamic capabilities I do so in the context of stated weaknesses in the absorptive capacity literature namely that there is an R D functional bias a scientific and technical knowledge content bias linked to R D at the expense of process knowledge and a methodological preference for quantitative descriptive studies Third with absorptive capacity as my lens specifically potential absorptive capacity which is only concerned with the acquiring and assimilation not the application of new external knowledge by a firm after Zahra and George 2002 I make an attempt to reveal the constituent processes of dynamic capabilities Fourth I discuss and reflect whether the development of absorptive capacity can be a dynamic capability in itself and what effects if any absorptive capacity has on existing or new dynamic

capabilities and the firm's resource base. Finally, by focusing on dynamic capabilities as processes or the how of change and absorptive capacity of knowledge of customer needs as the content or the what of change that is flowing through those processes, I make a tentative contribution to calls for the integration of the divergent research streams of strategy as process and strategy as content. Helfat with Maritan 2007. ICCS21 Antonio J.M. Ferreira, Francesco Tornabene, Nicholas Fantuzzi, Erasmo Viola, 2018-07-23. It is well known that the topic of composite materials affects many engineering fields such as civil, mechanical, aerospace, automotive, and chemical. In the last decades, in fact, a huge number of scientific papers concerning these peculiar constituents has been published. Analogously, the industrial progress has been extremely noticeable. The study of composite materials in general is a challenging activity since the advancements both in the academia and in the industry provide continually new sparks to develop innovative ideas and applications. The communication, the sharing, and the exchange of views can surely help the works of many researchers. This aspect represents the main purpose of this Conference, which aims to collect high-level contributions on the development and the application of composite materials. The establishment of this 21st edition of International Conference on Composite Structures has appeared appropriate to continue what has been begun during the previous editions. ICCS wants to be an occasion for many researchers from each part of the globe to meet and discuss about the recent advancements regarding the use of composite structures, sandwich panels, nanotechnology, bio-composites, delamination, and fracture, experimental methods, manufacturing, and other countless topics that have filled many sessions during this conference. As a proof of this event, which has taken place in Bologna, Italy, selected plenary and key-note lectures have been collected in the present book: *Journal of Scientific & Industrial Research*, 1998.

Network Knowledge in International Business European International Business Academy. Conference, 2002. This book focuses on current cutting-edge research concerning the increasing strategic importance of subsidiary networks to the multinational firm. It combines contributions from three major related areas of inquiry: the changing theoretical conception of networks and the structure of the multinational firm; the importance of spillovers and agglomeration economies related to multinational investments; and the management of the flow of information and knowledge from headquarters to subsidiaries and vice versa. The book approaches the network structure of the firm from the different perspectives of the expert international contributors while also combining theoretical perspectives with recent empirical evidence. **Network Knowledge in International Business** offers students in international business and strategy a cross-section of relevant research and current empirical evidence relating to knowledge management and the management of the modern multinational. **Journal of Dynamic Systems, Measurement, and Control**, 2007. **Journal of Engineering for Gas Turbines and Power**, 2002. **UKACC International Conference on Control '98**, 1998. **ASME Technical Papers**, 2000. 7th International Conference on Mechanical and Physical Behaviour of Materials Under Dynamic Loading: 2003.
