Zibaldone: The Notebooks of Leopardi Giacomo Leopardi, 2013-08-08 Giacomo Leopardi was the greatest Italian poet of the nineteenth century and was recognized by readers from Nietzsche to Beckett as one of the towering literary figures in Italian history To many he is the finest Italian poet after Dante Leopardi was also a prodigious scholar of classical literature and philosophy and a voracious reader in numerous ancient and modern languages For most of his writing career he kept an immense notebook known as the Zibaldone or hodgepodge as Harold Bloom has called it in which he put down his original wide ranging radically modern responses to his reading His comments about religion philosophy language history anthropology astronomy literature poetry and love are unprecedented in their brilliance and suggestiveness and the Zibaldone which was only published at the turn of the twentieth century has been recognized as one of the foundational books of modern culture Its 4 500 plus pages have never been fully translated into English until now when a team led by Michael Caesar and Franco D'Intino of the Leopardi Centre in Birmingham have spent years producing a lively accurate version This essential book will change our understanding of nineteenth century culture Giacomo Leopardi 1798 1837 Italy's first and greatest modern poet was also a critic philosopher and philologist His enormous Zibaldone or philosophical and critical notebook which many consider one of the great books of the 19th century was published in Penguin Classics in 2013

Forms of Thinking in Leopardi's Zibaldone Paola Cori, 2021-08-30

For fifteen years between 1817 and 1832 Giacomo Leopardi's notebook the Zibaldone grew like an expanding universe recording the emergence and development of his thought until on 4 December 1832 on page 4526 it fell silent Philosophical reflections private memories poetry observations on politics and society are only some of the creative expressions of Leopardi's quest which both enriched his everyday life and at the same time sheltered him from the tyranny of rationality and the death of illusions which he perceived as intrinsic to modernity There is no other work in world literature quite like it and yet strictly speaking the Zibaldone is not even a work Private in character but constantly opening up to virtual interlocutors it

gained readers only on publication sixty years after Leopardi's death. Its importance in Western thought however is yet to be fully appreciated not only in terms of its content but also in terms of its form. In this major new study Cori follows Leopardi's philosophical journey and traces the origin of a sensibility towards the ephemeral, the hyper-real and the simulacrum which would only truly be understood during modernity and post-modernity and which Leopardi is the first Italian thinker to perceive.
