

A network diagram with a central cloud and nine laptops connected to it. The cloud is a glowing white shape with a blue outline, positioned in the center. Nine laptops are arranged around the cloud, each on a small white circular base. They are connected to the cloud by thin white lines. The laptops are open, and some show a world map on their screens. The background is a dark blue gradient with a subtle pattern of white dots and lines, suggesting a network or data flow. The overall aesthetic is clean and modern, with a strong blue color scheme.

Tools for Teaching Computer Networking and Hardware Concepts Nurul Sarkar, 2006

Because of the high demand for networking and hardware skills in commerce and in industry worldwide computer networking and hardware courses are becoming increasingly popular in universities polytechnic institutions postsecondary colleges and private training institutions around the globe Despite this it is often difficult to motivate students to learn computer networking and hardware concepts because students appear to find the subject technical and rather dry and boring We strongly believe as do many others that students learn computer networking and hardware fundamentals better and feel more engaged with their courses if they are given interactive practical exercises that illustrate theoretical concepts There are numerous textbooks on computer networking and hardware concepts as well as publications including journals and conference proceedings in computer education and Web based learning However these publications have very limited discussion on software and hardware tools that enhance teaching and learning computer networking and hardware concepts To address this need we have written Tools for Teaching Computer Networking and Hardware Concepts focusing on the development and use of innovative tools for teaching and learning various aspects of computer networking and hardware concepts We believe the proposed book is unique and is a useful resource to both students and teachers at university polytechnic postsecondary and private training institutions This book

- 1 provides comprehensive coverage of tools and techniques for teaching and learning computer networking and hardware concepts at introductory and advanced levels
- 2 can be used as a resource both by students and by teachers in different teaching and learning contexts
- 3 offers both students and teachers an opportunity to benefit from the experience of teachers and researchers in other countries in the areas of teaching and learning computer networking and hardware
- 4 represents a rich starting point for researchers interested in developing innovative tools for teaching and learning computer networking and hardware concepts and
- 5 raises the awareness of the need to enhance face to face teaching through the use of online interactive learning and flexible mode of delivery of papers

Although various hardware and software tools methods and laboratory settings are discussed in the text an emphasis has been placed on the development and use of tools and techniques in the classroom that enhance the teaching and learning of various aspects of computer networking and hardware concepts
