Jan Zielonka,2023-02-07 A timely and compelling argument for a revitalized and restructured global politics The future seems increasingly uncertain Our democracies are failing to prevent financial crises energy shortages climate change and war so how can we look to the future with confidence Jan Zielonka argues that it is democracy's shortsightedness that makes politics stumble in our increasingly connected world With our governments still confined to the borders of nation states defending the short term interests of present day voters the consequences for future generations are dire In this incisive account Zielonka makes a bold case for a new politics of time and space He considers how democracy should adjust to the world of high speed and he questions our everyday experiences as citizens Is it acceptable for authorities and firms to monitor our whereabouts Why is the distribution of time and space so unequal And most crucially can we construct a new system of governance that will allow us to plan ahead with certainty [The Future Is Asian](#) Parag Khanna,2019-02-05 In the 19th century the world was Europeanized In the 20th century it was Americanized Now in the 21st century the world is being Asianized The Asian Century is even bigger than you think Far greater than just China the new Asian system taking shape is a multi civilizational order spanning Saudi Arabia to Japan Russia to Australia Turkey to Indonesia linking five billion people through trade finance infrastructure and diplomatic networks that together represent 40 percent of global GDP China has taken a lead in building the new Silk Roads across Asia but it will not lead it alone Rather Asia is rapidly returning to the centuries old patterns of commerce conflict and cultural exchange that thrived long before European colonialism and American dominance Asians will determine their own future and as they collectively assert their interests around the world they will determine ours as well There is no more important region of the world for us to better understand than Asia and thus we cannot afford to keep getting Asia so wrong Asia's complexity has led to common misdiagnoses Western thinking on Asia conflates the entire region with China predicts imminent World War III around every corner and regularly forecasts debt driven collapse for the region's major economies But in reality the region is experiencing a confident new wave of growth led by younger societies from India to the Philippines nationalist leaders have put aside territorial disputes in favor of integration and today's infrastructure investments are the platform for the next generation of digital innovation If the nineteenth century featured the Europeanization of the world and the twentieth century its Americanization then the twenty first century is the time of Asianization From investment portfolios and trade wars to Hollywood movies and university admissions no aspect of life is immune from Asianization With America's tech sector dependent on Asian talent and politicians praising Asia's glittering cities and efficient governments Asia is permanently in our nation's consciousness We know this will be the Asian century Now we finally have an accurate picture of what it will look like [Uses and Misuses of International Economic Law](#)

national or international Moritz J K Blenk applies a policy orientated approach to international law to comparatively analyze the role of private rulemaking within the context of international economic integration in the World Trade Organization and the European Union He thereby aims to elucidate the opaque phenomenon of private standardization from a legal perspective and more profoundly shed new light on economic integration

Chinese Way, The: Overcoming Challenges For A Shared Future Fabio Massimo Parenti, 2023-07-07 The book aims to communicate to readers in a clear fluent and well documented fashion the new role that China plays in the geography of world power evaluating its weight influence and impact on future developments China s ambition and its vision of international affairs can be summed up in Beijing s desire to build a community of common destiny for mankind Behind this concept lies the desire to present itself as a peaceful nation interested in a common global development in full compliance with the principles embraced by the United Nations to be achieved through win win relationships capable of bringing mutual benefits to the actors engaged in international cooperation China has experienced extraordinary growth in recent decades and intends to continue carving out the space it deserves in various international fora According to the author this does not necessarily represent a threat as its Western detractors contend given the People s Republic s intention to achieve its goals through mutual respect spatial interconnection and long term productive investments The book has been published in Italy by Meltemi and is in course of publication by the Chinese publisher New Star Press Those who deal with China are well aware that the West s gaze on the People s Republic has often been dismissive superficial and distorted A sort of festival of stereotyped opinions with value judgments constantly used to highlight the West s alleged superiority vis vis the Chinese model Regardless of whether one likes the Chinese political economic system or not no country can avoid engaging with it Especially if we consider that the exhaustion of the propulsive thrust of Western globalization is increasingly evident and corresponds conversely to the rise of a new constructive globalization with Chinese characteristics Fabio Massimo Parenti Youtube Author s commentary

Inventing Future Cities Michael Batty, 2018-12-11 How we can invent but not predict the future of cities We cannot predict future cities but we can invent them Cities are largely unpredictable because they are complex systems that are more like organisms than machines Neither the laws of economics nor the laws of mechanics apply cities are the product of countless individual and collective decisions that do not conform to any grand plan They are the product of our inventions they evolve In *Inventing Future Cities* Michael Batty explores what we need to understand about cities in order to invent their future Batty outlines certain themes principles that apply to all cities He investigates not the invention of artifacts but inventive processes Today form is becoming ever more divorced from function information networks now shape the traditional functions of cities as places of exchange and innovation By the end of this century most of the world s population will live in cities large or small sometimes contiguous and always connected in an urbanized world it will be increasingly difficult to define a city by its physical boundaries Batty discusses the coming great transition from a world with few cities to

a world of all cities argues that future cities will be defined as clusters in a hierarchy describes the future high frequency real time streaming city considers urban sprawl and urban renewal and maps the waves of technological change which grow ever more intense and lead to continuous innovation an unending process of creative destruction out of which future cities will emerge

Technocracy in America Parag Khanna, 2017-01-10 American democracy just isn't good enough anymore. A costly election has done more to divide American society than unite it while trust in government and democracy itself is plummeting. But there are better systems out there and America would be wise to learn from them. In this provocative manifesto, globalization scholar Parag Khanna tours cutting edge nations from Switzerland to Singapore to reveal the inner workings that allow them to lead the way in managing the volatility of a fast changing world while delivering superior welfare and prosperity for their citizens. The ideal form of government for the complex 21st century is what Khanna calls a direct technocracy, one led by experts but perpetually consulting the people through a combination of democracy and data. From a seven member presidency and a restructured cabinet to replacing the Senate with an Assembly of Governors, Technocracy in America is full of sensible proposals that have been proven to work in the world's most successful societies. Americans have a choice for whom they elect president but they should not wait any longer to redesign their political system following Khanna's pragmatic vision.

Splinternet Scott Malcomson, 2016-03-17 This is not your ordinary history of the Internet. Scott Malcomson has brilliantly extended the connections between Silicon Valley and the military back far beyond DARPA back in fact to World War I. If you want to understand the conflict between cyberspace utopians and the states and corporations who seek to dominate our virtual lives, you've got to read this book. James Ledbetter, editor, Inc Magazine. In elegant prose, powered by deep research and with a surprisingly vivid cast of characters, Scott Malcomson shows how profound the relationship is between the state and the Internet. As major powers try to assert control over the Web, Splinternet illuminates both how we got to this point and how to move forward. Parag Khanna, global contributor, CNN and author of Connectography: Mapping the Future of Global Civilization. There's always been something universalizing about the Internet. The World Wide Web has seemed both inherently singular and global, a sort of ethereal United Nations. But today, as Scott Malcomson contends in this concise, brilliant investigation, the Internet is cracking apart into discrete groups, no longer willing or able to connect. The implications of this shift are momentous. Malcomson traces the way the Internet has been shaped by government needs since the 19th century, above all the demands of the US military and intelligence services. From World War I cryptography and spying to weapons targeting against Hitler and then Stalin, the monolithic aspect of the digital network was largely determined by its genesis in a single state sponsored institution. In the 1960s, internationalism and openness were introduced by the tech pioneers of California's counter culture, the seed bed for what became Google, Microsoft, Facebook, and Apple. But in the last 15 years, security concerns of states and the privatizing impetus of e-commerce have come to the fore, and momentum has shifted in a new direction towards private walled domains, each vying with the other in an increasingly fragmented system, in effect a Splinternet. Because the Internet today surrounds us so comprehensively, it's easy to regard the way it functions as a simple, given part of the natural order of things. Only by stepping

back and scrutinizing the evolution of the system can we see the Internet for what it is a contested protean terrain constantly evolving as different forces intervene to drive it forward In that vital exercise Malcolmson s elegant erudite account will prove invaluable [Connectography](#) Parag Khanna,2016-09-29T00:00:00+02:00 Dalla sua città di residenza Singapore il famoso stratega geopolitico indiano Parag Khanna si spostato verso le mete più disparate dall Ucraina all Iran dalle miniere della Mongolia a Nairobi dalle coste atlantiche al circolo polare artico Grazie ai suoi viaggi ha avuto modo di osservare i mutamenti epocali che stanno investendo il mondo Migrazioni megalopoli Zone Economiche Speciali comunicazioni e cambiamenti climatici stanno ridisegnando la geografia planetaria gli Stati non sono più definiti dai loro confini bens dai flussi di persone e di legami finanziari commerciali ed energetici che quotidianamente li attraversano In questo scenario anche lo scontro fra potenze assume nuove forme trasformandosi in un forsennato tiro alla fune gli eserciti vengono usati tanto per difendere i territori quanto le risorse e le infrastrutture che vi sono custodite Sono i prodromi della definitiva scomparsa delle guerre Connectography che chiude la trilogia di cui I tre imperi e Come si governa il mondo sono i primi due volumi una mappa dettagliatissima che non solo ci offre una lucida analisi del presente ma ci propone una visione molto ottimistica del futuro che ci attende un mondo in cui le linee che lo connettono sono molte di più di quelle che lo separano A chi teme che il mondo stia diventando sempre più chiuso Connectography offre una nuova prospettiva più ottimistica The Economist La lungimiranza e l erudizione di Parag Khanna sono impareggiabili il futuro presidente degli Stati Uniti far bene a leggere questo libro Chuck Hagel ex segretario della Difesa USA Si tratta forse del libro più globale mai scritto specifico in maniera impressionante mantenendo l analisi su ampia scala Se le infrastrutture determinano il destino del mondo allora per capire dove il futuro dirige il suo corso basta seguire le reti delle supply chain descritte in questo libro Kevin Kelly Wired [Move](#) PARAG.
