**Gravity** James B. Hartle,2003 Providing relevant solutions of the Einstein equation this text introduces field equations of general relativity their supporting mathematics Emphasis is on the connection between observation theory and the phenomena of gravitational physics *Sixth Marcel Grossmann Meeting, The: On Recent Developments In Theoretical And Experimental General Relativity, Gravitation And Relativistic Field Theories (In 2 Volumes)* Humitaka Sato,1993-01-08 The Marcel Grossmann Meetings have been conceived with the aim of reviewing recent advances in gravitation and general relativity with particular emphasis on mathematical foundations and physical predictions The overall programme includes the broad categories of mathematical techniques cosmology quantum gravity astrophysics gravitational radiation and experimental developments The proceedings contain invited and contributed papers **The Kalam Cosmological Argument, Volume 2** Paul Copan,William Lane Craig,2017-11-16 The ancient kalam cosmological argument maintains that the series of past events is finite and that therefore the universe began to exist Two recent scientific discoveries have yielded plausible prima facie physical evidence for the beginning of the universe The expansion of the universe points to its beginning to a Big Bang as one retraces the universe s expansion in time And the second law of thermodynamics which implies that the universe s energy is progressively degrading suggests that the universe began with an initial low entropy condition The kalam cosmological argument perhaps the most discussed philosophical argument for God s existence in recent decades maintains that whatever begins to exist must have a cause And since the universe began to exist there must be a transcendent cause of its beginning a conclusion which is confirmatory of theism So this medieval argument for the finitude of the past has received fresh wind in its sails from recent scientific discoveries This collection reviews and assesses the merits of the latest scientific evidences for the universe s beginning It ends with the kalam argument s conclusion that the universe has a cause a personal cause with properties of theological significance *The Philosophy of Cosmology* Khalil Chamcham,Joseph Silk,John D. Barrow,Simon Saunders,2017-04-13 Following a long term international collaboration between leaders in cosmology and the philosophy of science this volume addresses foundational questions at the limit of science across these disciplines questions raised by observational and theoretical progress in modern cosmology Space missions have mapped the Universe up to its early instants opening up questions on what came before the Big Bang the nature of space and time and the quantum origin of the Universe As the foundational volume of an emerging academic discipline experts from relevant fields lay out the fundamental problems of contemporary cosmology and explore the routes toward finding possible solutions Written for graduates and researchers in physics and philosophy particular efforts are made to inform academics from other fields as well as the educated public who wish to understand our modern vision of the Universe related philosophical questions and the significant impacts on scientific methodology Mathematical Reviews ,2005 New Scientist ,1993 Geometric Flows Huai-Dong Cao,Shing-Tung Yau,2008 **Physics Briefs** ,1994

**PASCAL** ,1994    **International Aerospace Abstracts** ,1989    *Реферативный журнал* ,1984    U.S. Government Research and Development Reports ,1965    **Signalñaiñañ informatñsñiiñañ** ,1985    New Scientist and Science Journal ,1993-08    **Government Reports Announcements** ,1965    INIS Atomindex ,1988    **Classical and Quantum Gravity** ,2001    **IBZ** ,1985    Index of Mathematical Papers ,1985    **Cosmic Questions** James B. Miller,James Bradley Miller,2001 Examined are recent astronomical findings and developments in theoretical cosmology in order to better understand three broad questions Was the Universe Created Is the Cosmos Designed Are we Alone The questions are addressed by a broad spectrum of scholars including astronomers cosmologists philosophers and religious scholars who examine the three questions in terms of humanity s place within the universe
