Mathematical Problems In Image Processing Partial:

Mathematical Problems in Image Processing Gilles Aubert, Pierre Kornprobst, 2008-04-06 Partial differential equations and variational methods were introduced into image processing about 15 years ago and intensive research has been carried out since then. The main goal of this work is to present the variety of image analysis applications and the precise mathematics involved. It is intended for two audiences: The first is the mathematical community to show the contribution of mathematics to this domain and to highlight some unresolved theoretical questions. The second is the computer vision community to present a clear self-contained and global overview of the mathematics involved in image processing problems. The book is divided into five main parts: Chapter 1 is a detailed overview; Chapter 2 describes and illustrates most of the mathematical notions found throughout the work; Chapters 3 and 4 examine how PDEs and variational methods can be successfully applied in image restoration and segmentation processes; Chapter 5, which is more applied, describes some challenging computer vision problems such as sequence analysis or classification. This book will be useful to researchers and graduate students in mathematics and computer vision.

Mathematical Problems in Image Processing Gilles Aubert, Pierre Kornprobst, 2008-11-01 The updated 2nd edition of this book presents a variety of image analysis applications, reviews their precise mathematics, and shows how to discretize them. For the mathematical community, the book shows the contribution of mathematics to this domain and highlights unsolved theoretical questions. For the computer vision community, it presents a clear self-contained and global overview of the mathematics involved in image processing problems. The second edition offers a review of progress in image processing applications covered by the PDE framework and updates the existing material. The book also provides programming tools for creating simulations with minimal effort.
