Workshop Statistics Discovery With Data 4th Edition:

Workshop Statistics Allan J. Rossman, Beth L. Chance, 2011-10-25 Allan Rossman's 4th Edition of *Workshop Statistics Discovery with Data* is enhanced from previous issues with more focus and emphasis on collaborative learning. It further requires student observation and integrates technology for gathering, recording, and synthesizing data. The text offers more flexibility in selecting technology tools for classrooms, primarily using technologies other than graphing calculators or Fathom Dynamic Data software. Furthermore, it presents more standards for teaching statistics in an innovative, investigative, and accessible way, as well as providing in-depth guidance and resources to support active learning of statistics and includes updated real data sets with everyday applications in order to promote statistical literacy.

Workshop Statistics: Allan J. Rossman, Beth L. Chance, 2013-12-01 Shorn of all subtlety and led naked out of the protective fold of educational research literature, there comes a sheepish little fact: lectures don't work nearly as well as many of us would like to think. George Cobb, 1992. This book contains activities that guide students to discover statistical concepts, explore statistical principles, and apply statistical techniques. Students work toward these goals through the analysis of genuine data and through interaction with one another, with their instructor, and with technology. Providing a one-semester introduction to fundamental ideas of statistics for college and advanced high school students, *Workshop Statistics* is designed for courses that employ an interactive learning environment by replacing lectures with hands-on activities. The text contains enough expository material to stand alone, but it can also be used to supplement a more traditional textbook. Some distinguishing features of *Workshop Statistics* are its emphases on active learning, conceptual understanding, genuine data, and the use of technology. The following sections of this preface elaborate on each of these aspects and also describe the unusual organizational structure of this text.

Teaching Statistics Using Baseball Jim Albert, 2022-02-04 Teaching Statistics Using Baseball is a collection of case studies and exercises applying statistical and probabilistic thinking to the game of baseball Baseball is the most statistical of all sports since players are identified and evaluated by their corresponding hitting and pitching statistics There is an active effort by people in the baseball community to learn more about baseball performance and strategy by the use of statistics This book illustrates basic methods of data analysis and probability models by means of baseball statistics collected on players and teams Students often have difficulty learning statistics ideas since they are explained using examples that are foreign to the students The idea of the book is to describe statistical thinking in a context that is baseball that will be familiar and interesting to students The book is organized using a same structure as most introductory statistics texts There are chapters on the analysis on a single batch of data followed with chapters on comparing batches of data and relationships There are chapters on probability models and on statistical inference The book can be used as the framework for a one semester introductory statistics class focused on baseball or sports This type of class has been taught at Bowling Green State University It may be very suitable for a statistics class for students with sports related majors such as sports management or sports medicine Alternately the book can be used as a resource for instructors who wish to infuse their present course in probability or statistics with applications from baseball The second edition of Teaching Statistics follows the same structure as the first edition where the case studies and exercises have been replaced by modern players and teams and the new types of baseball data from the PitchFX system and fangraphs.com are incorporated into the text
