XML appears to be the future of data interchange. It provides a powerful way to describe and encode data that is system independent. Based on HTML, XML is quickly becoming the standard data interchange language for Business-to-Business applications.

In this introductory session you will learn what XML is, what the syntax looks like, how it can be used in your RPG applications, and how it will likely affect your applications in the future.

The author, Susan Gartner, is co-founder of Partner400, a firm specializing in customized education and mentoring services for AS/400 and iSeries developers. After a 12-year career with IBM, including several years at the Rochester and Toronto laboratories, Susan is now devoted to educating developers on technology and technologies to extend and modernize their applications and development environments. This is done via private custom classes as well as conferences and user group events.
