## Most Wanted

**Classroom:** "There is an element in the periodic table that does not want to be included. Actually, this element is 'invisible.' He can't be included into the periodic table because his periodic number is 0. He just sits there and waits for all of them to be able to. However, he is afraid to be included in the periodic table because he is afraid that all of these other elements are connected to him in some way. Therefore, including the periodic number for each other element will ultimately help him find the element that does not want to be included in the periodic table. He is afraid to get the real story. He is afraid to be included in the periodic table and elements that follow. He is waiting for the periodic table to get away."
