***Practical Software Architecture*** Tilak Mitra, 2015-11-18. Getting Architecture Just Right: Detailed Practical Guidance for Architecting Any Real World IT Project. To build effective architectures, software architects must tread a fine line between precision and ambiguity. It's a delicate balance, but crucial. Failure to achieve this balance often leads directly to poor systems design and implementation. Now, pioneering IBM Distinguished Engineer and Chief Technology Officer Tilak Mitra offers the first complete guide to developing end-to-end solution architectures that are just enough: identifying and capturing the most important artifacts without over-engineering or excessive documentation, and providing a practical approach to consistent and repeated success in defining software architectures. *Practical Software Architecture* provides detailed prescriptive and pragmatic guidance for architecting any real-world IT project, regardless of system methodology or environment. Mitra specifically identifies the artifacts that require emphasis and shows how to communicate evolving solutions with stakeholders, bridging the gap between architecture and implementation.

***Practical Plant Virology*** Jeanne Dijkstra, Cees de Jager, 2012-12-06. The idea for this book arose from what we perceived as the need for an up-to-date guide to class exercises in plant virology. We were encouraged to proceed after receiving 29 positive responses out of 30 replies to our enquiries from colleagues worldwide. To the best of our knowledge, no such publications have appeared since D. Noordam's book containing practical exercises (Noordam, 1973) and the latest 1988 edition of the American Phytopathological Society's *Laboratory Exercises in Plant Pathology*, in which 4 out of its 31 chapters discuss plant viruses. Our original plan was to aim this publication at students and teachers of plant virology, plant pathology, plant breeding, and microbiology. However, both colleagues and our publisher suggested widening the scope of the book by making it useful also for research workers and laboratory technicians. Therefore, we decided to prepare a laboratory manual of interest to all groups. We have tried to cover all relevant branches of plant virology, including the molecular aspects, in as far as they pertain to the detection and basic characterisation of plant viruses. We have not included protocols for the molecular biology of plant viruses, sequencing, construction of recombinants, transgenic plants, etc., as they are presented adequately in many other recent publications. The protocols in this book are described in a manner which should be understandable to those with a basic knowledge of biology and chemistry.

***Advanced Manufacturing and Automation VIII*** Kesheng Wang, Yi Wang, Jan Ola Strandhagen, Tao Yu, 2018-12-14. This proceeding is a compilation of selected papers from the 8th International Workshop of Advanced Manufacturing and Automation (IWAMA 2018) held in Changzhou, China, on September 25-26, 2018. Most of the topics are focusing on novel techniques for manufacturing and automation in Industry 4.0 and smart factory. These contributions are

vital for maintaining and improving economic development and quality of life The proceeding will assist academic researchers and industrial engineers to implement the concepts and theories of Industry 4.0 in industrial practice in order to effectively respond to the challenges posed by the 4th industrial revolution and smart factory
