

# Example of a Population Estimate using a **Mark-Recapture** Method in a Closed Population

**Before sampling:** all fish in a pond (closed population) are unmarked

10 fish are captured, **marked**, and released back into the pond

The sample shows that 5 marked and 5 unmarked fish were captured

The pond is re-sampled

$$\frac{\text{\# of tagged fish } 10}{\text{\% of marked fish } .5 \text{ in sample}} = \text{20}$$

Estimated population of all fish in the pond

I recommend it unreservedly to individuals, students, and researchers, as well as libraries. Richard M. Laws. MARINE MAMMALS SCIENCE establishes a solid and satisfying foundation for current study and future exploration. Ronald J. Shusterman. SCIENCE *Assessment Approaches to Support Bycatch Management for Marine Mammals* Tessa Francis, Jeff Moore, Andre Eric Punt, Randall Reeves, 2022-06-21 Reptile Ecology and Conservation C. Kenneth Dodd Jr., 2016-05-05 This practical handbook of reptile field ecology and conservation brings together a distinguished international group of reptile researchers to provide a state-of-the-art review of the many new and exciting techniques used to study reptiles. The authors describe ecological sampling techniques and how they are implemented to monitor the conservation status and population trends of snakes, lizards, tuatara, turtles, and crocodilians throughout the world. Emphasis is placed on the extent of statistical inference and the biases associated with different techniques and analyses. The chapters focus on the application of field research and data analysis for achieving an understanding of reptile life history, population dynamics, movement patterns, thermal ecology, conservation status, and the relationship between reptiles and their environment. The book emphasizes the need for thorough planning and demonstrates how a multi-dimensional approach incorporates information related to morphology, genetics, molecular biology, epidemiology, statistical modelling, animal welfare, and biosecurity. Although accentuating field sampling sections on experimental applications in laboratories and zoos, thermal ecology, genetics, landscape ecology, disease, and biosecurity, and management options are included. Much of this information is scattered in the scientific literature or not readily available, and the intention is to provide an affordable, comprehensive synthesis for use by graduate students, researchers, and practising conservationists worldwide. **Encyclopedia of Marine Mammals** Bernd Würsig, J.G.M. Bay sound and estuary BSE populations of bottlenose dolphins are common along the U S Atlantic and Gulf of Mexico coasts NOAA Fisheries currently identifies 9 BSE

stocks in the Atlantic and 32 in the northern Gulf of Mexico Accurate abundance estimates for these stocks are an essential component of MMPA mandated stock assessment yet only three of these BSE stocks have up to date abundance estimates Abundance estimates based on data more than 8 years old are not considered valid for management i e to estimate PBR under the MMPA and those more than 5 years old drop a stock assessment from adequate to inadequate under the NOAA Fisheries Stock Assessment Improvement Plan For most stocks in U S waters aerial and or large vessel line transect surveys provide the platforms for abundance estimation Linetranssect distance analysis methods from vessels and planes are relatively well understood and these methods are more or less standardized While line transect surveys using small boats may be appropriate for some estuarine systems such surveys are not suitable when working inside estuarine waters with complex topography and turbid waters As a result alternative methodologies have been utilized most centered around the use of photo identification photo ID capture mark recapture CMR techniques Introduction *Aquatic Sciences and Fisheries Abstracts*, 1995 **Protected Marine Areas** Henry Augier, 1985 *The Comprehensive Assessment of Whale Stocks* International Whaling Commission, 1989 *Report of the Commission - International Whaling Commission* International Whaling Commission, 1996 Individual Recognition of Cetaceans Philip S.
