

Unit 2

Analogy and Digital Signal

Analogy Signal :

- A signal which is a continuous function of time and used to carry the information is known as an analogy signal.
- An analogy signal represents a quantity analogous to another quantity, for example, in case of an analogy audio signal, the instantaneous value of signal voltage represents the pressure of sound wave.

Digital Signal :

- A signal that is discrete function of time i.e. which is not a continuous signal, is known as a digital signal.
- The digital signals are represented in the binary form and consist of different values of voltage at discrete instants of time.
- A Digital signal represents the data and information as a sequence of digit separate value at any given time.
