Database Security, II Carl E. Landwehr,1989 This second volume reports research and development results in the area of database security Topics discussed include the development of a proper framework for stating database system security requirements and particularly how the notion of roles can best be applied The application of object oriented database systems to enforce security requirements stated in terms of role authorizations appears to be a promising avenue for further work Characterization and control of the problems of

aggregation and inference have also been the subject of considerable effort and some progress The utility of establishing a common problem framework for testing proposed solutions to database security problems is also recognized The group tentatively agreed to use a hypothetical database of medical information for this purpose since this application can involve complex yet intuitive requirements for secrecy integrity and availability Such a database could require controlling access authorizations for a variety of roles including those of patients doctors nurses pharmacists epidemiological researchers and insurers Contents Policy and Models Security Models and Enterprise Models J E **Photonics 2000** S.
