Reeds 21st Century Ship Management John W Dickie, 2014-04-17 The first modern title to cover the varied and complex world of ship management in the 21st century Ship management has constantly had to evolve to take into account the advancements in technology as well as the demands of the shipping industry Having internet access and email on board ship has meant that the ship manager has to possess certain sets of skills to function effectively in the post including computer literacy The emergence of large multi national ship management companies has also changed how business is conducted and this in turn means that the ship manager and tiers of management within the organization have had to evolve to cope with the demands of working with a multi national workforce Furthermore since the mid 1980s there has been an ever expanding raft of legislation that is more restrictive for companies to meet and a shrinking of profit margins has seen a shift in how companies are required to operate to survive This book addresses the demands of 21st century ship management with the focus of the book as much on the people who manage ships as on the theory and practice of ship management

The IMLI Treatise On Global Ocean Governance David Joseph Attard, Rosalie P Balkin, Donald W Greig, 2018-07-11 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically With seemingly no opportunity for revision due to the Conventions burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations This approach is inherently fragmented and unable to achieve sustainable global ocean governance In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI

Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans The volume examines how the IMO with 171 Member States and 3 Associated Members has and continues to promote the goals of safe secure sound and efficient shipping on clean oceans It studies the interface and interaction between UNCLOS and IMO instruments and how IMOs safety security and environmental protection conventions have contributed to global ocean governance including the peaceful order of the polar regions
