Strategy Process Content Context Emea:

Strategy, HRM, and Performance Jaap Paauwe, Elaine Farndale, 2017-11-10 The book expounds the macro level relationship between strategy HRM and performance addressing important challenges that have constrained research and practice to date Adopting a critical perspective the first challenge is a narrow definition of performance that has been largely driven by a managerialist profit motive with little regard for the human element This book proposes adopting a more balanced approach towards measuring performance encompassing both organizational financial performance as well as employee well being The second challenge is that HRM has largely been considered a universalistic phenomenon rather than needing to be understood in the context in which an organization is operating The book puts forward the argument for a more context centric perspective culminating in the development of the Contextual Strategic Human Resource Management Framework The book emphasizes the importance of strategy alignment context the role of actors and a holistic conceptualisation of performance Embedded in all chapters is a focus on achieving an appropriate balance between options rather than providing a universalistic solution to all human resource management challenges
