

## Chapter 43: The Immune System

- 43.1 Outline how innate immunity blocks pathogen entry and triggers rapid responses upon recognition of pathogens.*
- 43.2 Describe the origin, structure, and function of adaptive immune receptors.*
- 43.3 Compare and contrast adaptive immune responses against pathogens in body fluids and in body cells.*
- 43.4 Use examples to illustrate how interference with immune system function can contribute to diseases.*

Our students consider this chapter to be a particularly challenging and important one. Expect to work your way slowly through the first three concepts. Take particular care with Concepts 43.2 and 43.3. It is rewarding, however, in Concept 43.4 to put your new knowledge to work and truly understand the devastation caused by the destruction of helper T cells by HIV. In addition, the topic of cell communication underlies all the signals and responses described in this system. All in all, this chapter is core to your study of biology this year.
