1) Do your own work. These problems are similar to what will occur on the second lecture exam, final exam and lab quizzes. Do not share or work with others since you cannot do this on the exams.

2) Make sure to write your final answer in the boxes, but feel free to use the rest of the page for calculations. Whenever you are determining the results of a cross, write out the Punnett Square!

3) When you assign letters to alleles, make sure to choose letters that look clearly different in upper and lower case. Also make sure you know which is the dominant and recessive allele and phenotype.
