## **Archaeological Theory In Practice:**

Archaeological Theory in Practice Patricia A Urban, 2017-07-05 In this concise friendly textbook Patricia Urban and Edward Schortman teach the basics of archaeological theory making explicit the crucial link between theory and the actual conduct of archaeological research The first half of the text addresses the general nature of theory as well as how it is used in the social sciences and in archaeology in particular To demonstrate the usefulness of theory the authors draw from research at Stonehenge Mesopotamia and their own long term research project in the Naco Valley of Honduras They show how theory becomes meaningful when it is used by very real individuals to interpret equally real materials These extended narratives exemplify the creative interaction between data and theory that shape our understanding of the past Ideal for introductory courses in archaeological theory

Archaeological Theory in Practice Patricia A Urban, Edward Schortman, 2017 Many students view archaeological theory as a subject distinct from field research This division is reinforced by the way theory is taught often in stand alone courses that focus more on logic and reasoning than on the application of ideas to fieldwork Divorcing thought from action does not convey how archaeologists go about understanding the past This book bridges the gap between theory and practice by looking in detail at how the authors and their colleagues used theory to interpret what they found while conducting research in northwest Honduras This is not a linear narrative Rather the book highlights the open ended nature of archaeological investigations in which theories guide research whose findings may challenge these initial interpretations and lead in unexpected directions Pursuing those novel investigations requires new theories that are themselves subject to refutation by newly gathered data The central case study is the writers work in Honduras The interrelations of fieldwork data theory and interpretation are also illustrated with two long running archaeological debates the emergence of inequality in southern Mesopotamia and inferring the ancient meanings of Stonehenge The book is of special interest to undergraduate Anthropology Archaeology majors and first and second year graduate students along with anyone interested in how archaeologists convert the static materials we find into dynamic histories of long vanished people
