Library Notes North Carolina College for Women. Library, 1926 **List of Additions, with Notes** Free Public Library (Worcester, Mass.), 1878 *How we Get Mendel Wrong, and Why it Matters* Kostas Kampourakis, 2023-12-28 This book illustrates that the stereotypical representations of Gregor Mendel and his work misrepresent his findings and their historical context The author sets the historical record straight and provides scientists with a reference guide to the respective scholarship in the early history of genetics The overarching argument is twofold on the one hand that we had better avoid naive hero worshipping and understand each historical figure Mendel in particular by placing them in the actual sociocultural context in which they lived and worked on the other hand that we had better refrain from teaching in schools the naive Mendelian genetics that provided the presumed scientific basis for eugenics Key Features Corrects the distorting stereotypical representations of Mendelian genetics and provides an authentic picture of how science is done focusing on Gregor Mendel and his actual contributions to science Explains how the oversimplifications of Mendelian genetics were exploited by ideologues to provide the presumed scientific basis for eugenics Proposes a shift in school education from teaching how the science of genetics is done using model systems to teaching the complexities of development through which heredity is materialized *Harvard University Bulletin* Harvard University, 1880 Harvard University Bulletin , 1880

The United States Catalog Mary Burnham, Carol Hurd, 1928 **Books in Series** , 1985 Vols for 1980 issued in three parts Series Authors and Titles **Library Bulletin** , 1882 **Bulletin of More Important Accessions with Bibliographical Contributions** Justin Winsor, 1882 **Catalogue of the Central Lending Library** Newcastle Central Library, 1908 *André Bazin's Film Theory* Angela Dalle Vacche, 2020 Through metaphors and allusions to art science and religion Andr Bazin s writings on the cinema explore a simple yet profound question what is a human For the famous French film critic a human is simultaneously a rational animal and an irrational being Bazin s idea of the cinema is a mind machine where the ethical implications have priority over aesthetic issues And in its ability to function as an art form for the masses cinema is the only medium that can address an audience at the individual and community levels simultaneously the audience sees the same film but each individual relates to the narrative in a different way In principle cinema can unsettle our routines in productive ways and expand our sense of belonging to a much larger picture By arguing that this dissident Catholic s worldview is anti anthropocentric Angela Dalle Vacche concludes that Andr Bazin s idea of the cinema recapitulates the histories of biological evolution and modern technology inside our consciousness Through the projection of recorded traces of the world onto a brain like screen the cinema can open viewers up to self interrogation and empathy towards Otherness Bazin was neither a spiritualist nor an animist or a pantheist yet his film theory leads also to ideas of a more cosmological persuasion through editing and camera movement cinema explores our belonging to a vast universe that extends from the microbes of the microscope to the stars of the telescope Such ideas of connectedness coupled with Bazin s well known

emphasis of realism form the foundation for his film theory s embrace of Italian neorealism Choosing to avoid a quantitative naturalism based on accumulation of details Bazin s theory instead promotes the kind of cinema that celebrates perceptual displacement the objectification of human behavior and one s own critical self awareness *Catalogue of Books Perth* (W.A.). Public Library,1905

Formal Ontology in Information Systems P. Garbacz,O. Kutz,2014-09-05 Formal Ontology in Information Systems FOIS is the flagship conference of the International Association for Ontology and its Applications IAOA Its interdisciplinary research focus lies at the intersection of philosophical ontology linguistics logic cognitive science and computer science as well as in the applications of ontological analysis to conceptual modeling knowledge engineering knowledge management information systems development library and information science scientific research and semantic technologies in general As in previous years FOIS 2014 was a nexus of interdisciplinary research and communication The current proceedings is divided into four main sections dealing with foundations processes agency and dispositions methods and tools and applications The last of these covers a broad spectrum of areas including in particular biology and medicine engineering and economy For the first time in its history the conference hosted a special track an ontology competition the aim of which was to encourage authors to make their ontologies publicly available and to allow them to be evaluated according to a set of predetermined criteria Papers discussing these ontologies can also be found in this volume The book will be of interest to all those whose work involves the application of ontologies and who are looking for a current overview of developments in formal ontology

Theistic Evolution J. P. Moreland,Stephen C. Meyer,Christopher Shaw,Ann K. Gauger,Wayne Grudem,2017-11-15 Many prominent Christians insist that the church must yield to contemporary evolutionary theory and therefore modify traditional biblical ideas about the creation of life They argue that God used albeit in an undetectable way evolutionary mechanisms to produce all forms of life Featuring two dozen highly credentialed scientists philosophers and theologians from Europe and North America this volume contests this proposal documenting

evidential logical and theological problems with theistic evolution making it the most comprehensive critique of theistic evolution yet produced Catalogue of Books in the Public Library of Western Australia, (Queen Victoria Jubilee Memorial) Public Library of Western Australia, Western Australia. Public Library, Perth, 1905 *Nature's Prophet* Michael A. Flannery, 2018-08-07 An astute study of Alfred Russel Wallace's path to natural theology A spiritualist libertarian socialist women's rights advocate and critic of Victorian social convention Alfred Russel Wallace was in every sense a rebel who challenged the emergent scientific certainties of Victorian England by arguing for a natural world imbued with purpose and spiritual significance *Nature's Prophet Alfred Russel Wallace and His Evolution from Natural Selection to Natural Theology* is a critical reassessment of Wallace's path to natural theology and counters the dismissive narrative that Wallace's theistic and sociopolitical positions are not to be taken seriously in the history and philosophy of science Author Michael A. Flannery provides a cogent and lucid account of a crucial and often underappreciated element of Wallace's evolutionary worldview As co-discoverer with Charles Darwin of the theory of natural selection Wallace willingly took a backseat to the well-bred better-known scientist Whereas Darwin held fast to his first published scientific explanations for the development of life on earth Wallace continued to modify his thinking refining his argument toward a more controversial metaphysical view which placed him within the highly charged intersection of biology and religion Despite considerable research into the naturalist's life and work Wallace's own evolution from natural selection to natural theology has been largely unexplored yet as Flannery persuasively shows it is readily demonstrated in his writings from 1843 until his death in 1913 *Nature's Prophet* provides a detailed investigation of Wallace's ideas showing how although he independently discovered the mechanism of natural selection he at the same time came to hold a very different view of evolution from Darwin Ultimately Flannery shows Wallace's reconsideration of the argument for design yields a more nuanced version of creative and purposeful theistic evolution and represents one of the most innovative contributions of its kind in the Victorian and Edwardian eras profoundly influencing a later generation of scientists and intellectuals *Book Catalogue of the Library of the Royal Society* Royal Society (Great Britain). Library, Alan James Clark, 1982 **Elements of the Comparative Anatomy of Vertebrates** Robert Wiedersheim, 1897
