Federal Cloud Computing Strategy Vivek Kundra, Chief Information Officers Council (U.S.), 2018 The Federal Government's current information technology environment is characterized by low asset utilization a fragmented demand for resources duplicative systems environments which are difficult to manage and long procurement lead times These inefficiencies negatively impact the Federal Government's ability to serve the American public

Overview and Issues for Implementation of the Federal Cloud Computing Initiative Congressional Research Service, 2015-02-19 Cloud computing is a new name for an old concept the delivery of computing services from a remote location analogous to the way electricity water and other utilities are provided to most customers Cloud computing services are delivered through a network usually the Internet Some cloud services are adaptations of familiar applications such as email and word processing Others are new applications that never existed as a local application such as online maps and social networks Since 2009 the federal government has been shifting its data storage needs to cloud based services and away from agency owned data centers This shift is intended to reduce the total investment by the federal government in information technology IT data centers as well as realize other stated advantages of cloud adoption efficiency accessibility collaboration rapidity of innovation reliability and security In December 2010 the U S Chief Information Officer CIO released A 25 Point Implementation Plan to Reform Federal IT Management as part of a comprehensive effort to increase the operational efficiency of federal technology assets One element of the 25 Point Plan is for agencies to shift to a Cloud First policy which is being implemented through the Federal Cloud Computing Strategy The Cloud First policy means that federal agencies must 1 implement cloud based solutions whenever a secure reliable and cost effective cloud option exists and 2 begin reevaluating and modifying their individual IT budget strategies to include cloud computing However there are challenges facing agencies as they make this shift For example some agency CIOs have stated that in spite of the stated security advantages of cloud computing they are in fact concerned about moving their data from their data centers which they manage and control to outsourced cloud services This and other concerns must be addressed to build an agency culture that trusts the cloud Congress has a number of means to monitor the status of the Federal Cloud Computing Initiative FCCI Individual committees may wish to monitor agencies under their jurisdiction by holding hearings

requesting review of an agency's status through the agency itself or a GAO study and or assessing an agency's progress and projected goals against the stated goals of the FCCI **Federal Cloud Computing Strategy** The White House, 2011-02-08 The Federal Government's current Information Technology IT environment is characterized by low asset utilization a fragmented demand for resources duplicative systems environments which are difficult to manage and long procurement lead times These inefficiencies negatively impact the Federal Government's ability to serve the American public Cloud computing has the potential to play a major part in addressing these inefficiencies and improving government service delivery The cloud computing model can significantly help agencies grappling with the need to provide highly reliable innovative services quickly despite resource constraints Why buy a book you can download for free We print this book so you don't have to First you gotta find a good clean legible copy and make sure it's the latest version not always easy Some documents found on the web are missing some pages or the image quality is so poor they are difficult to read We look over each document carefully and replace poor quality images by going back to the original source document We proof each document to make sure it's all there including all changes If you find a good copy you could print it using a network printer you share with 100 other people typically it's either out of paper or toner If it's just a 10 page document no problem but if it's 250 pages you will need to punch 3 holes in all those pages and put it in a 3 ring binder Takes at least an hour It's much more cost effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material We publish compact tightly bound full size books 8 by 11 inches with large text and glossy covers 4th Watch Books is a Service Disabled Veteran Owned Small Business SDVOSB If you like the service we provide please leave positive review on Amazon.com Without positive feedback from the community we may discontinue the service and you all can go back to printing these books manually yourselves For more titles published by 4th Watch Books please visit cybahwebplus.net
