Validation, and Relevance Thomas Zoëga Ramsoy, Hilke Plassmann, Carolyn Yoon, Joseph T. Devlin, 2023-08-07 Consumer neuroscience has become an expanding area of both research and conduct spanning from academic interests in the brain bases of consumption choices to commercial application of neuroscience tools and metrics. However, many of these advances are still criticized for low applicability, scattered publication records, conceptual vagueness, and a lack of proper scientific and commercial validation. To make matters worse, there is now a host of proposed commercial applications of both the insights from neuroscience and the application of neuroscience and neurophysiology tools to test consumer responses. While many of these approaches may be valid, many other approaches are either not properly validated or may be flawed, misguided, or even outright lies. As a discipline, there is a need for both the basic and applied research in consumer neuroscience to become aligned. The purpose of this Research Topic is to provide this much-needed platform for such an industrial alignment. In doing so, this Research Topic will provide perspectives on three main areas: 1) distinctions between basic translational and applied consumer neuroscience research; 2) conceptual clarification on key concepts relevant to the science and application of consumer neuroscience; 3) validation of consumer neuroscience methods and how they relate to commercially relevant cases. For this Research Topic, we therefore welcome submissions that combine academic and commercial research all in the vein of making advances in establishing a valid, applicable consumer neuroscience.

Ethics and Neuromarketing Andrew R. Thomas, Nicolae Alexandru Pop, Ana Maria Iorga, Cristian Ducu, 2016-10-19 This book addresses the emerging field of neuromarketing, which at its core aims to better understand the impact of marketing stimuli by observing and interpreting human emotions. It includes contributions from leading researchers and practitioners venturing beyond the tactics and strategies of neuromarketing to consider the ethical implications of applying powerful tools for data collection. The rationale behind neuromarketing is that human decision making is not primarily a conscious process. Instead, there is increasing evidence that the willingness to buy products and services is an emotional process where the brain uses short-cuts to accelerate the decision-making process. At the intersection of economics, neuroscience, consumer behavior, and cognitive psychology, neuromarketing focuses on which emotions are relevant in human decision making and uses this knowledge to make marketing more effective. The knowledge is applied in product design, enhancing promotions, and advertising, pricing, professional services, and store design, and improving the consumer experience as a whole. The foundation for all of this activity is data gathering and analysis. Like many new processes and innovations, much of neuromarketing is operating far ahead of current governmental compliance and regulation, and thus current practices are raising ethical issues. For example, facial recognition software used to monitor and detect a wide range of micro-expressions has been tested at several airports under the guise of security and counterterrorism. To what extent is it acceptable to screen the entire population using these powerful and intrusive techniques without getting

passengers consent Citing numerous examples from the public and private sectors the editors and contributing authors argue that while the United States has catalyzed technological advancements European companies and governments are more progressive when it comes to defining ethical parameters and developing policies This book details many of those efforts and offers rational constructive approaches to laying an ethical foundation for neuromarketing efforts *Becoming a Critical Thinker* Sherry Diestler, 2009 La seguridad en el lugar de trabajo y la proteccion ambiental pueden ser promovidas mediante acuerdos sobre las normas la certificacin y el etiquetado de productos Esta publicacin ofrece una reseña de las normas que se aplican a los cultivos de exportacin de los pases en desarrollo en particular los de la agricultura orgnica el etiquetado relativo al comercio justo la norma de responsabilidad social SA8000 el Programa para la agricultura sostenible de la Rainforest Alliance la Iniciativa sobre comercio tico la norma ISO 14001 y EurepGap En esta publicacin se estudia el origen de estas iniciativas su alcance y los distintos sistemas de certificacin Asimismo se analiza la participacin de los interesados el procedimiento de establecimiento de normas los mtodos de verificacin las relaciones con los Acuerdos de la Organizacin Mundial del Comercio y el posible papel de los gobiernos Veintids estudios de casos ilustran los efectos que las normas y programas de certificacin han tenido sobre los costos de produccion y los ingresos de los productores en los pases en desarrollo Se proporcionan adems los datos ms recientes sobre los mercados del banano caf t y ctricos que llevan la etiqueta de certificacin ambiental o social La presente obra podr ser de utilidad para los gobiernos empresas privadas y organizaciones no gubernamentales que enfrentan decisiones complejas en materia de normas sociales y ambientales certificacin y etiquetado Neuromarketing Jason Petit, 2021-04-12 55% OFF for Bookstores NOW at 15 74 instead of 35 97 LAST DAYS Why do we often buy products without having any need for them What are the unconscious processes that lead to purchase Are you an entrepreneur and looking for a way to increase the conversion rate Neuromarketing is a doctrine that combines neuroscience and marketing knowing its fundamental principles means understanding which brain mechanisms occur in consumers during the process of purchasing a product or service The discipline is based on the principle that 95% of purchasing decisions depend on processes that are activated at an unconscious i e irrational level This book sets itself the objective of explaining neuromarketing in a clear and thorough way The evolution of marketing techniques during the digital age makes it necessary to be informed and updated about the latest trends Understanding the theoretical aspects of neuromarketing allows you to have a competitive advantage over most of the activities that still ignore the importance of psychology and persuasion in business Understanding neuromarketing is also the best way to increase sales without spending more money on advertising since it is the conversion rate that is increased Neuromarketing is an opportunity you should not miss This book is the solution for you if You are an entrepreneur or have a business and want to increase your sales and profits You have a business and want to make your advertising campaigns more effective You are passionate about neuromarketing and want to learn more about it You don t know this discipline and would like to learn more about it You are
