New Cosmetic Science has been written to give as many people as possible a better understanding of the subject from scientists and technologists specializing in cosmetic research and manufacturing to students of cosmetic science and people with a wide range of interests concerning cosmetics. The relationship between the various disciplines comprising cosmetic science and cosmetics is described in Part I. In addition to discussing the safety of cosmetics, the Usefulness of Cosmetics rapidly becoming an important theme is described using research examples. The latest findings on cosmetic stability are presented as are databases, books and magazines increasingly used by cosmetic scientists. Part II deals with cosmetics from a usage viewpoint including skin care cosmetics, makeup cosmetics, hair care cosmetics, fragrances, body cosmetics and oral care cosmetics. Oral care cosmetics and body cosmetics are presented with product performance types, main components, prescriptions and manufacturing methods described for each item. This excellent volume enlightens the reader not only on current cosmetics and usage but indicates future progress enlarging the beneficial effects of cosmetics. Products with better pharmaceutical properties, cosmeceuticals working both physically and psychologically are also highlighted. **Practical Cosmetic Science**

Anne Elizabeth Young, 1974 Discovering Cosmetic Science Stephen Barton, Allan Eastham, Amanda Isom, Denise Mclaverty, Yi Ling Soong, 2020-09-23 Welcome to this novice's guide. At last a book that explains the real science behind the cosmetics we use. Taking a gentle approach and a guided journey through the different product types we discover that they are not as superficial as often thought and learn that there is some amazing science behind them. We shall uncover some of the truths behind the myths and point out some interesting facts on our way. Did you know Vitamin E is the world's most used cosmetic active ingredient. At just 1mm thick your amazing skin keeps out just about everything it's exposed to including your products. A chemical soup of amino acids, urea, mineral salts and organic acids act as water magnets in the skin keeping it naturally moisturised. Discovered centuries ago iron oxides, yes the same chemicals as rust, are still commonly used inorganic pigments in foundations. A lipstick is a fine balance of waxes, oils and colourants to keep the stick stable and leave an even gloss on your lips. **Handbook of Cosmetic Science and Technology** André O.
