1. Write a C program to print your name, date of birth, and mobile number.

```
include <stdio.h>
int main()
{
printf("Name : Alexandra Abramov\n");
printf("DOB : July 14, 1975\n");
printf("Mobile_number : 99-9999999999\n");
return(0);
}
```

2. Write a C program to read the age of a candidate and determine whether it is eligible for casting his/her own vote.

```
#include <stdio.h>
void main()
{
int v_age;

printf("Enter the age of the candidate : ");
scanf("%d",&v_age);
if (v_age<18)
{
printf(" I am sorry, you are not eligible to cast your vote.\n");
printf("You would be able to cast your vote after %d year.\n",18-v_age);
}
Else
printf("Congratulation! You are eligible for casting your vote.\n");
}
```

3. Write a C program to input a year and check whether year is leap year or not using conditional operator

```
#include <stdlib.h>

int year;
printf ("Enter a year to check I whether or not it is leap year \n");
scanf ("%d", &year);

printf ("%s", ((year%4==0 && year%100!=0) ?
"LEAP YEAR": (year%400 ==0 ) ?
"IS A LEAP YEAR": "NOT A LEAP YEAR"));

ADO.NET Cookbook Bill Hamilton, 2003 Designed in the highly regarded O Reilly Cookbook format ADO NET Cookbook is strikingly different from other books on the subject It isn t bogged down with pages of didactic theory The ADO NET Cookbook focuses exclusively on providing developers with easy to find coding solutions to real problems ADO NET Cookbook is a comprehensive collection of over 150 solutions and best practices for everyday dilemmas For each problem addressed in the book there s a solution a short focused piece of code that programmers can insert directly into their applications And ADO NET Cookbook is more than just a handy compilation of cut and paste C and VB NET code ADO NET Cookbook offers clear explanations of how and why the code works warns of potential pitfalls and directs you to sources of additional information so you can learn to adapt the problem solving techniques to different situations This is a painless way for developers who prefer to learn by doing to expand their skills and productivity while solving the pressing problems they face every day These time saving recipes include vital topics like connecting to data retrieving and managing data

transforming and analyzing data modifying data binding data to NET user interfaces optimizing NET data access enumerating and maintaining database objects and maintaining database integrity The diverse solutions presented here will prove invaluable over and over again for ADO NET programmers at all levels from the relatively inexperienced to the most sophisticated

Programming and Problem Solving with C++ Nell B. Dale, Chip Weems, Mark R. Headington, 2002 This book continues to reflect our experience that topics once considered too advanced can be taught in the first course The text addresses metalanguages explicitly as the formal means of specifying programming language syntax

C Programming with Problem Solving Jacqueline A. Jones, Keith Harrow, 2001 Jones and Harrow present programming concepts in the context of solving problems Each chapter introduces a problem first and then covers the C language elements needed to solve it Students can see how a program is built from its simplest beginning to its final polished form This book introduces beginning programming concepts using the C language Each chapter introduces a problem to solve and then covers the C language constructs necessary to solve the problem Rather than presenting a series of polished one step solutions to programming problems this text seeks to lead you through the process of analyzing problems and writing programs to solve them This text is intended to be used in a one or two semester course covering introductory programming using C No previous knowledge of mathematics or computer science is assumed other than a familiarity with the mathematical notation used in a high school algebra course

Optimization and Related Topics Alexander M. Rubinov, Barney M. Glover, 2013-04-17 This volume contains in part a selection of papers presented at the sixth Australian Optimization Day Miniconference Ballarat 16 July 1999 and the Special Sessions on Nonlinear Dynamics and Optimization and Operations Research Methods and Applications which were held in Melbourne July 11 15 1999 as a part of the Joint Meeting of the American Mathematical Society and Australian Mathematical Society The editors have strived to present both contributed papers and survey style papers as a more interesting mix for readers Some participants from the meetings mentioned above have responded to this approach by preparing survey and semi survey papers based on presented lectures Contributed papers which contain new and interesting results are also included The fields of the presented papers are very large as demonstrated by the following selection of key words from selected papers in this volume optimal control stochastic optimal control MATLAB economic models implicit constraints Bellman principle Markov process decision making under uncertainty risk aversion dynamic programming optimal value function emergent computation complexity traveling salesman problem signal estimation neural networks time congestion teletraffic gap functions nonsmooth variational inequalities derivative free algorithm Newton's method auxiliary function generalized penalty function modified Lagrange function convexity quasiconvexity abstract convexity

Progress in Optimization Andrew Eberhard, Robin Hill, Daniel Ralph, Barney M. Glover, 2013-12-01 Although the monograph Progress in Optimization I Contributions from Australasia grew from the idea of publishing a proceedings of the Fourth Optimization Day held in July 1997 at the Royal Melbourne Institute of Technology

the focus soon changed to a refereed volume in optimization The intention is to publish a similar book annually following each Optimization Day The idea of having an annual Optimization Day was conceived by Barney Glover the first of these Optimization Days was held in 1994 at the University of Ballarat Barney hoped that such a yearly event would bring together the many but widely dispersed researchers in Australia who were publishing in optimization and related areas such as control The first Optimization Day event was followed by similar conferences at The University of New South Wales 1995 The University of Melbourne 1996 the Royal Melbourne Institute of Technology 1997 and The University of Western Australia 1998 The 1999 conference will return to Ballarat University being organized by Barney s long time collaborator Alex Rubinov In recent years the Optimization Day has been held in conjunction with other locally held national or international conferences This has widened the scope of the monograph with contributions not only coming from researchers in Australia and neighboring regions but also from their collaborators in Europe and North America
