Ace the Technical Interview Michael F. Rothstein, 1994. Filled with sure win interview techniques, hundreds of sample technical questions, updates on hot new areas, and more, here is a crash course on winning your next technical interview and getting the job you want. For all computer professionals about to embark on a job search in a tough competitive market, this information-packed guide is the place to start. The book begins with a complete introduction to the interview process from three perspectives: the applicant, the employment agency, and the employer. You'll learn the various types of interview scenarios, how to control the process to your advantage, spot curve ball trick questions, watch the agency screening process in action, and get expert tips on preparation and performance. Then you'll move on to the latest literature and brush up on important technical skills. Senior level specialists will update you on a full range of mainframe shop activities and products including MVS, CICS, VSAM, DB2, UNIX, OS/2, Rel/2, 1/SQL, plus cutting edge areas like OOP and client server systems. Each technical chapter contains 70 to 100 questions that not only test your knowledge of the material but prepare you to give the credible answers the interviewer is expecting from a well qualified candidate. Whether you are looking for a beginning, intermediate, or advanced position in the computer field, this book is the quickest way to raise your level of technical expertise while learning the ins and outs of the job searching process. Put the experience of seasoned professionals who know what the changing job market demands to work for you and handle your next technical interview with ease.

Empirical Studies of Programmers Curtis R. Cook, Jean C. Scholtz, James C. Spohrer, 1993 This volume looks at the obvious trend in the computing evolution from studies of student programmers and toward studies of real programmers performing real programming tasks The percentage of student and professional programmers in the studies reported in papers presented at ESP 1 and ESP 5 has nearly flip flopped There is now an emphasis on the practical application of the research results both in industry and in academia The papers and posters of this workshop include a range of programming language paradigms beyond the procedural paradigm functional logic visual object oriented and concurrent programming This appears to be an indication of the maturation of the field No longer is it a question of whether to study programmers but more a question of which aspects of the programming that make it an important area of study
