Learning Java by Building Android Games John Horton, 2021-03-26. Get ready to learn Java the fun way by developing games for the Android platform with this new and updated third edition. Key Features: Learn Java Android and object-oriented programming from scratch. Find out how to build games including Sub Hunter, Retro Pong, Bullet Hell, Classic Snake, and Scrolling Shooters. Create and design your own games by learning all the concepts that a game developer must know. Book Description: Android is one of the most popular mobile operating systems today. It uses the most popular programming language, Java, as one of the primary languages for building apps of all types. Unlike most other Android books, this book doesn't assume that you have any prior knowledge of Java programming; instead, it helps you get started with building Android games as a beginner. This new, improved, and updated third edition of *Learning Java by Building Android Games* helps you to build Android games from scratch. Once you've got to grips with the fundamentals, the difficulty level increases steadily as you explore key Java topics such as variables, loops, methods, object-oriented programming, OOP, and design patterns while working with up-to-date code and supporting examples. At each stage, you'll be able to test your understanding by implementing the concepts that you've learned to develop a game. Toward the end, you'll build games such as Sub Hunter, Retro Pong, Bullet Hell, Classic Snake, and Scrolling Shooter. By the end of this Java book, you'll not only have a solid understanding of Java and Android basics but will also have developed five cool games for the Android platform. What you will learn: Set up a game development environment in Android Studio. Respond to a player's touch and program intelligent enemies who can challenge the player in different ways. Explore collision detection, sprite sheets, animation, simple tracking and following, AI, parallax backgrounds, and particle explosions. Animate objects at 60 FPS and manage multiple independent objects using OOP. Work with design patterns such as OOP, singleton, strategy, and entity-component. Work with the Android API, the SoundPool API, Paint, Canvas, Bitmap classes, and detect version numbers. Who this book is for: *Learning Java by Building Android Games* is for anyone who is new to Java, Android, or game programming and wants to develop Android games. The book will also serve as a refresher for those who already have experience using Java on Android or any other platform but are new to game development.

Beginning Android 4 is an update to *Beginning Android 3* originally written by Mark Murphy. It is your first step on the path to creating marketable apps for the burgeoning Android Market, Amazon's Android Appstore, and more. Google's Android operating system has taken the industry by storm, going from its humble beginnings as a smartphone operating system to its current status as a platform for apps that run across a gamut of devices, from phones to tablets to netbooks to televisions, and the list is sure to grow. Smart developers are not sitting idly by in the stands but are jumping into the game of creating innovative and salable applications for this fast-growing mobile and consumer device platform. If you're not in the game yet, now is your chance. *Beginning Android 4* is fresh with details on the latest iteration of the Android platform. Begin at the beginning by installing the tools and compiling a skeleton app. Move through creating layouts, employing widgets, taking user input, and giving back results. Soon you'll be creating innovative applications involving multi-touch, multi-tasking, location-based feature sets, using GPS. You'll be drawing data live from the Internet using web services and delighting your customers with life-enhancing apps. Not since the PC era first began has there been this much opportunity for the common developer. What are you waiting for? Grab your copy of *Beginning Android 4* and get started.
