

Bmw Engine Training

M Mark

Bmw Engine Training:

Training in the Motor Vehicle Repair and Sales Sector in the Netherlands European Centre for the Development of Vocational Training, 1994 Training in the motor vehicle repair and sales sector in the Netherlands was examined in a study that included the following approaches review of the sector's structure characteristics institutional and social context employment practices changing conditions and available education and training in depth case studies of four auto repair shops and dealerships two small one medium sized and one large firm and identification of economic employment and training trends It was discovered that in response to stagnation of the Dutch motor vehicle sales and repair industry in the 1990s both the Dutch government and the industry have increased their commitment to vocational training and inservice courses and have created a training infrastructure that compares favorably with those of other sectors in the Dutch economy All four businesses studied in depth were managed by individuals who were very involved in training had access to good facilities and opportunities for on the job teaching training and could avail themselves of good external provisions for inservice training Quality of service was an important element of training philosophy Training needs were not always analyzed in a very structured way and none of the businesses studied evaluated systematically the costs benefits of training Contains 20 references and 19 tables figures MN

Training in the Motor Vehicle Repair and Sales Sector in Germany Rainer Lichte, European Centre for the Development of Vocational Training, 1994 Training in the motor vehicle repair and sales sector in Germany was examined in a study that included the following approaches review of the sector's structure characteristics institutional and social context employment practices trends changes in the type of work and employment training requirements and available initial and continuing vocational education and training in depth case studies of five auto repair shops and dealerships and identification of economic employment and training trends It was discovered that although the motor industry remains the most important industry in Germany's economy it will not likely experience any more growth Vehicle sales are declining however the volume of repairs is likely to increase as cars become older Higher qualifications are being demanded of repair shop employees because of new environmental safety standards and technological advances Only about 7% of the sector's employees have no relevant vocational qualification and one in every five employees is engaged in vocational training Nearly all employees in aftersales departments and repair shops participate regularly in in house continuing training and or courses provided by manufacturers importers suppliers or chambers of trades however many people in positions of responsibility within the sector still do not consider the available training activities sufficient Contains 63 tables figures and 33 references MN
