Simulators International XIV Maurice Ades, Roy Fray, 1997 **Guidelines for Upgrade and Modernization of Nuclear Power Plant Training Simulators** International Atomic Energy Agency, 2006 The use of simulators for the training and qualification of control room operating personnel has become a standard practice throughout the world to develop and reinforce knowledge of plant systems and their relationships to increase the ability to apply plant procedures to advance practical skills in operating the plant in normal abnormal and emergency conditions and to build supervisory skills and teamwork Simulators are also utilized to conduct the authorization or licensing examinations of control room operating personnel and there is an increasing trend in the use of simulators for non training purposes The simulator should be adequately maintained and upgraded to ensure that it continues to be a viable training tool that accurately replicates the operational characteristics of the reference nuclear power plant NPP The upgrade or modernization of the simulator should be conducted based upon the proven project management principles and methods discussed in this report The combined simulator upgrade knowledge and experience of many NPPs and simulator vendors have been compiled and examples of specific simulator upgrade projects are included in the appendices as well as on the attached CD ROM Industrial Automation Technologies Chanchal Dey, Sunit Kumar Sen, 2020-05-28 The book begins with an overview of automation history and followed by chapters on PLC DCS and SCADA describing how such technologies have become synonymous in process instrumentation and control The book then introduces the niche of Fieldbuses in process industries It then goes on to discuss wireless communication in the automation sector and its applications in the industrial arena The book also discusses the all pervading IoT and its industrial cousin IIoT which is finding increasing applications in process automation and control domain The last chapter introduces OPC technology which has strongly emerged as a defacto standard for interoperable data exchange between multi vendor software applications and bridges the divide between heterogeneous automation worlds in a very effective way Key features Presents an overall industrial automation scenario as it evolved over the years Discusses the already established PLC DCS and SCADA in a thorough and lucid manner and their recent advancements Provides an insight into today's industrial automation field Reviews Fieldbus communication and WSNs in the context of industrial communication Explores IIoT in process automation and control fields Introduces OPC which has already carved out a niche among industrial communication technologies with its seamless connectivity in a heterogeneous automation world Dr Chanchal Dey is Associate Professor in the Department of Applied Physics Instrumentation Engineering Section University of Calcutta He is a reviewer of IEEE Elsevier Springer Acta Press Sage and Taylor Francis Publishers He has more than 80 papers in international journals and conference publications His research interests include intelligent process control using conventional fuzzy and neuro fuzzy techniques Dr Sunit Kumar Sen is an ex professor Department of Applied Physics Instrumentation Engineering Section University of Calcutta He was a coordinator of two projects sponsored by AICTE and
