**Computer Programming Examples for Chemical Engineers** George Ross, 1987 Written by a chemical engineer rather than by a computer scientist this book fills the gap between texts which teach computer languages or programming methods and chemical engineering texts which omit details of writing programs In order to write a computer program and get it to work general theoretical principles are not enough one has to actually do the job This is done in each case by first taking the reader through a manual calculation then presenting a computer program to perform the same task Explanation of how the program operates is given in some detail Topics discussed in this way include computer flowsheeting interpretation and accessing of results and physical data forward feed multi effect evaporation binary distillation linear programming introduction to finite differences with simple heat exchanger example steady state multi dimensional heat conduction unsteady state heat conduction solution of automatic control problems using finite differences In each case the necessary theory is fully introduced The programs are written in BASIC an easily learnt moderately powerful language available on both mainframe and desk top computers

**Unit Operations of Chemical Engineering** Warren Lee McCabe, Julian Cleveland Smith, Peter Harriott, 2001 The seventh edition of Unit Operations of Chemical Engineering contains new material throughout the textbook and many additional problems However the basic structure general level of treatment and overall length are largely unchanged This is an introductory text written for undergraduates in their junior or senior year who have completed the usual courses in mathematics chemistry physics and an introduction to chemical engineering An elementary knowledge of the above mentioned subjects and energy balances is assumed Book Jacket [Les actes du XVIIIe Congrès International du Froid, Montréal \(Quebec\) Canada, 10-17 août 1991](#) Institut International du Froid, 1991

**Engineering and Food** W. E. Spiess, H. Schubert, 1990-04-24 Proceedings of the
