Encyclopedia of Black Studies Molefi Kete Asante, Ama Mazama, 2004-10-01 Click Additional Materials for downloadable samples. The Encyclopedia of Black Studies is the leading reference source for dynamic and innovative research on the Black experience. The concept for the encyclopedia was developed from the successful Journal of Black Studies (SAGE) and contains a full analysis of the economic, political, sociological, historical, literary, and philosophical issues related to Americans of African descent. This single volume reference is the vanguard of the recent explosive growth in quality scholarship in the field. More than a chronicle of Black culture or Black people, this encyclopedia deals with the emergence and maturity of an intellectual field over the past four decades. Beginning with the protests at San Francisco State College in 1967 that led to the first degree-granting department of Black Studies, the field's rapid growth over time necessitates an authoritative account of the discipline. More than ever, scholars and students need a clear conception of what the evolutionary processes have been in the creation and maintenance of the discipline.

 On Race and Philosophy is a collection of essays written and published across the last twenty years which focus on matters of race philosophy and social and political life in the West in particular in the US These important writings trace the author s continuing efforts not only to confront racism especially within philosophy but more importantly to work out viable conceptions of raciality and ethnicity that are empirically sound while avoiding chauvinism and invidious ethnocentrism The hope is that such conceptions will assist efforts to fashion a nation state in which racial and ethnic cultures and identities are recognized and nurtured contributions to a more just and stable democracy
