

DEVELOPMENTAL SEQUENCE IN SMALL GROUPS¹

BRUCE W. TUCKMAN

Naval Medical Research Institute, Bethesda, Maryland

50 articles dealing with stages of group development over time are separated by group setting, as follows: therapy-group studies, T-group studies, and natural- and laboratory-group studies. The stages identified in these articles are separated into those descriptive of social or interpersonal group activities and those descriptive of group-task activities. Usually, 4 general stages of development are proposed, and the review consists of fitting the stages identified in the literature to those proposed. In the social realm, these stages in the developmental sequence are testing-dependence, conflict, cohesion, and functional roles. In the task realm, they are orientation, emotionality, relevant opinion exchange, and the emergence of solutions. There is a good fit between observed stages and the proposed model. Further study of temporal change as a dependent variable via the manipulation of specific independent variables is suggested.

The purpose of this article is to review the literature dealing with the developmental sequence in small groups, to evaluate this literature as a body, to extrapolate general concepts about group development, and to suggest fruitful areas for further research.

While small-group processes have been given great attention in recent years by behavioral scientists, the question of change in process over time has been relatively neglected. Perhaps the major reason for this is the overwhelming tendency of the small-group researcher to run groups for short periods of time and thus avoid the "problems" created by temporal change. Laboratory studies of developmental phenomena are quite rare. The majority of articles dealing with sequential group development come from the group-therapy setting and human relations training-group setting, neither of which features strict experimental control nor manipulation of independent variables. Moreover, the only major theoretical statements of group development which have appeared are those of Bales (1953), Schutz (1958), and Bach (1954).

In an attempt to bring the facts and the issues into sharper focus, existing research in

the area of small-group development will be cited, and a framework within which this phenomenon can be better understood and further investigated will be presented. This framework will also serve to integrate the variety of studies cited in a meaningful way.

CLASSIFICATION MODEL

The classification approach adopted for distinguishing between and within developmental studies is a threefold one. The delineations are based on (a) the setting in which the group is found, (b) the realm into which the group behavior falls at any point in time, that is, task or interpersonal, and (c) the position of the group in a hypothetical developmental sequence (referred to as the stage of development). It is this last delineation that allows not only for the separation and ordering of observations within each setting, but for the development of additional hypotheses as well.

Setting

Classification according to setting allows for the clustering of studies based on their similarity of features, for example, group size, group problem area, group composition, duration of "group life," etc. More similarity between observations made in the same setting than in different settings is expected.

In the *group-therapy setting* the task is to help individuals better deal with their personal problems. The goal is individual adjust-

Leveraging Transdisciplinary Engineering in a Changing and Connected World Adam Cooper, 2023-11-15 Simple problems have become rare in today's technologically advanced world. Problems are typically much more complex and solving them requires integrative knowledge from several disciplines. Technology alone cannot be the answer. Collaborative teams equipped with knowledge and skills in various disciplines are indispensable to exploit technologies effectively and create new conceptual, theoretical, methodological, and translational innovations that integrate and move beyond discipline-specific approaches to address a common problem in the changing and connected world. This book presents the proceedings of TE2023, the 30th International Conference on Transdisciplinary Engineering held in Hua Hin Cha Am Thailand from 11-14 July 2023. The theme of this year's conference was Leveraging Transdisciplinary Engineering in a Changing and Connected World, and it provided a forum for more than 115 participants from academia and industry to exchange knowledge and ideas connected to this aspect of transdisciplinary engineering. A total of 117 submissions were received for the conference of which 93 were selected for presentation and publication here following a rigorous abstract and full paper review process. They are arranged under 7 categories: product design and development, team working, smart operations for value chain management, transdisciplinary approaches, engineering education, critical issues in transdisciplinary engineering, and theoretical contributions. Providing a comprehensive overview of the latest innovations and ideas in transdisciplinary engineering, the book will be of interest to all those working in the field.

Workshop Proceedings of the 11th International Conference on Intelligent Environments D. Preuveneers, 2015-07-06 With emerging trends such as the Internet of Things, sensors and actuators are now deployed and connected everywhere to gather information and solve problems, and such systems are expected to be trustworthy, dependable, and reliable under all circumstances. But developing intelligent environments which have a degree of common sense is proving to be exceedingly complicated, and we are probably still more than a decade away from sophisticated networked systems which exhibit human-like thought and intelligent behavior. This book presents the proceedings of four workshops and symposia: the 4th International Workshop on Smart Offices and Other Workplaces (SOOW'15), the 4th International Workshop on the Reliability of Intelligent Environments (WoRIE'15), the Symposium on Future Intelligent Educational Environments and Learning (SOFIEE'15), and the 1st Immersive Learning Research Network Conference (iLRN'15). These formed part of the 11th International Conference on Intelligent Environments held in Prague, Czech Republic in July 2015, which focused on the development of advanced, reliable intelligent environments, as well as newly emerging and rapidly evolving topics. This overview of and insight into the latest developments of active researchers in the field will be of interest to all those who follow developments in the world of intelligent environments.

Systematic Observation: Engaging Researchers in the Study of Daily Life as It Is Lived M. Teresa Anguera,Angel Blanco-Villaseñor,Gudberg K. Jonsson, José Luis Losada,Mariona Portell,2019-10-04 Assessment in natural contexts through observation is unquestionably complex Systematic observation grounded in observational methodology offers a wide range of possibilities to the rigorous study of everyday behavior in their natural context These possibilities have been enriched in recent decades with the explosion of information and communication technologies In this eBook we assemble 23 articles from several researchers who have made important contributions to this evolving field The articles included in this eBook has been organized with a first part on general methodological developments and a second part with methodological contributions that emphasize different application areas Considering the enormous possibilities of the systematic observation in the study of daily life we hope this eBook will be useful to understand innovative applications in different fields

Computer Vision in Control Systems-3 Margarita N. Favorskaya,Lakshmi C. Jain,2017-10-25 The research book is a continuation of the authors previous works which are focused on recent advances in computer vision methodologies and technical solutions using conventional and intelligent paradigms The book gathers selected contributions addressing aerial and satellite image processing and related fields Topics covered include novel tensor and wave models a new comparative morphology scheme warping compensation in video stabilization image deblurring based on physical processes of blur impacts and a rapid and robust core structural verification algorithm for feature extraction in images and videos among others All chapters focus on practical implementations Given the tremendous interest among researchers in the development and applications of computer vision paradigms in the field of business engineering medicine security and aviation this book offers a timely guide

The Top Books of the Year Developmental Sequence In Small Groups Openvce The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Developmental Sequence In Small Groups Openvce : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Pape, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
