Jak-Stat Signaling : From Basics to Disease Thomas Decker, Mathias Müller, 2012-06-06 JAK tyrosine kinases and STAT transcription factors constitute a signaling pathway which is activated by cytokines By activating gene transcription it regulates essential biological responses to environmental cues The Jak Stat pathway is involved in the regulation of cell development differentiation proliferation and apoptosis Improper function may contribute to hematopoietic malignancies and cancer This book provides comprehensive insights into the latest basic and clinical developments in the field The first part reviews recent findings and new technologies pertaining to basics of Jak Stat function The second part describes the evolution of Jak Stat signaling and the

role of the pathway in invertebrate organisms The third part focuses on Jak Stat signaling in hematopoietic cells under both physiological and pathophysiological conditions Finally chapters in the fourth section describe the relationship of Jak Stat signaling to various states of disease particularly infection leukemias and solid cancers The book is intended for all scientists in molecular biology biochemistry and cell biology dealing with biomedical issues

Foundations of Data Exchange

Marcelo Arenas,Pablo Barceló,Leonid Libkin,Filip Murlak,2014-03-06 The problem of exchanging data between different databases with different schemas is an area of immense importance Consequently data exchange has been one of the most active research topics in databases over the past decade Foundational questions related to data exchange largely revolve around three key problems how to build target solutions how to answer queries over target solutions and how to manipulate schema mappings themselves The last question is also known under the name metadata management since mappings represent metadata rather than data in the database In this book the authors summarize the key developments of a decade of research Part I introduces the problem of data exchange via examples both relational and XML Part II deals with exchanging relational data Part III focuses on exchanging XML data and Part IV covers metadata management
