ABSTRACT

This study investigated the availability and utilization of instructional materials in the teaching and learning of biology in senior secondary schools in Talata Mafara Town, Zamfara State. A descriptive survey research design was adopted for the study using quantitative data. The population comprised all the heads of department of biology in the senior secondary schools (six public and four private) in Talata Mafara Town. The entire population constituted the sample of the study due to its small size. A validated questionnaire with reliability index of 0.63 obtained using Cronbach's alpha was used as instrument for data collection. The data collected were analyzed using frequency counts and percentages presented in tables and charts. Five research questions guided the study. The findings of the study revealed that some of the required instructional materials are fairly available but are not regularly use by biology teachers. Biology laboratories and instructional materials relating to multimedia are lacking in most of the schools in Talata Mafara Town. Lack of fund for procurement and large class size coupled with lack of in-service training for serving biology teachers were major factors identified to inhibit effective provision and utilization of instructional materials respectively. Based on these findings, the study recommended among others that biology teachers in Talata Mafara Town should make effort in utilizing available instructional materials. Zamfara State Government should build biology laboratories and make provision for instructional materials especially multimedia related in all senior secondary schools in Talata Mafara. Professional development of biology teachers should be encouraged and sponsored by government and other relevant stake holders.

INTRODUCTION

No country can afford to disregard science at any level of education due to its impact on national development. At the senior secondary school level, biology is one of the key science subjects required in senior secondary school certificate examination (SSCE) (Ogbuze & Okoli, 2020; Umar, 2011; Umar et al., 2020). Biology is a science subject that aims at equipping students with appropriate scientific attitude, competences, and ability to apply scientific knowledge to every challenges of life. functional scientific attitudes. Several topics in biology such as ecology, cell theory, metabolism, osmosis, and so on, require approaches promoting experimental problem-solving and process-based skills (Jeronen et al., 2017). According to Ogbuze and Okoli (2020), nearly all science and arts students choose biology as they enroll for senior secondary class. Reason being that biology serves as a prerequisite subject for many fields of study (Adesola et al., 2022) and professions such as medicine, nursing, pharmacy, microbiology, biomedical technology, biochemistry, and other related disciplines. Thus, it contributes immensely to the national development. Also, Matazu (2022) stressed that biology is a very important subject for technological development. The subject is fundamental for individual well-being, development of good living environment and acquisition of functional scientific attitudes. It is therefore imperative that secondary school students are well-grounded in biology for Nigeria to attain the state of national development it desires (Nahu et al., 2021).

However, in spite of the relevance of biology, the manner of teaching and learning of the subject as well as the students'
