NanoRevolution Abderrahman Abbassi, 2025-06-16 As the global push toward energy accelerates *NanoRevolution* Unveiling the Future of Energy through Advanced Materials and Digital Technologies brings forward a powerful vision of how advanced materials and digital technologies are redefining energy solutions This comprehensive resource navigates the frontiers of nanotechnology artificial intelligence AI and IoT applications within the renewable energy sector presenting innovative strategies that address today s most pressing energy challenges Across 15 chapters *NanoRevolution* covers transformative advancements in photovoltaic and energy storage technologies It explores the application of density functional theory DFT in developing high efficiency lead free solar cells new methodologies for enhancing MXenes based materials and emerging AI powered solutions for energy optimization and predictive maintenance The book also examines IoT driven innovations in photovoltaic systems and provides a high level overview of blockchain s potential in secure energy transactions This book is an invaluable guide for researchers engineers and industry professionals focused on next generation energy solutions offering both theoretical depth and practical applications to drive progress toward a sustainable energy future

Proceedings of the Future Technologies Conference (FTC) 2024, Volume 2 Kohei Arai, 2024-11-04 This book covers proceedings of the Future Technologies Conference FTC 2024 which showcase a collection of thoroughly researched studies presented at the ninth Future Technologies Conference held in London the UK This premier annual event highlights groundbreaking research in artificial intelligence computer vision data science computing ambient intelligence and related fields With 476 submissions FTC 2024 gathers visionary minds to explore innovative solutions to today s most pressing challenges The 173 selected papers represent cutting edge advancements that foster vital conversations and future collaborations in the realm of information technologies The authors extend their deepest gratitude to all contributors reviewers and participants for making FTC 2024 an unparalleled success The authors hope this volume inspires and informs its readers encouraging continued exploration and innovation in future technologies

High-Performance Modelling and Simulation for Big Data Applications Joanna Kołodziej, Horacio González-Vélez, 2019-03-25 This open access book was prepared as a Final Publication of the COST Action IC1406 High Performance Modelling and Simulation for Big Data Applications cHiPSet project Long considered important pillars of the scientific method Modelling and Simulation have evolved from traditional discrete numerical methods to complex data intensive continuous analytical optimisations Resolution scale and accuracy have become essential to predict and analyse natural and complex systems in science and engineering When their level of abstraction raises to have a better discernment of the domain at hand their representation gets increasingly demanding for computational and data resources On the other hand High Performance Computing typically entails the effective use of parallel and distributed processing units coupled with efficient storage communication and visualisation systems to underpin complex data intensive applications in distinct scientific and technical domains It is then

arguably required to have a seamless interaction of High Performance Computing with Modelling and Simulation in order to store compute analyse and visualise large data sets in science and engineering Funded by the European Commission cHiPSet has provided a dynamic trans European forum for their members and distinguished guests to openly discuss novel perspectives and topics of interests for these two communities This cHiPSet compendium presents a set of selected case studies related to healthcare biological data computational advertising multimedia finance bioinformatics and telecommunications
