Studying black bears

After years studying North America's black bears in the (0) way, wildlife biologist Luke Robertson felt no closer to understanding the creatures. He realised that he had to (1)..... their trust. Abandoning scientific detachment, he took the daring step of forming relationships with the animals, bringing them food to gain their acceptance.

The (2) this has given him into their behaviour has allowed him to dispel certain myths about bears. (3) to popular belief, he contends that bears do not (4) as much for fruit as previously supposed. He also (5) claims that they are ferocious. He says that people should not be (6) by behaviour such as swatting paws on the ground, as this is a defensive, rather than an aggressive, act.

However, Robertson is no sentimentalist. After devoting years of his life to the bears, he is under no (7) about their feelings for him. It is clear that their interest in him does not (8)..... beyond the food he brings.
