

Cooling Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the first lecture, *Foundations of Cooling Theory*. These are generalised and give insights on problems for all of the cooling gases, from the perspective of the results on the lecture, the likely contribution to Cooling Theory and the needs of students and their supervisors at the University of Oxford. I also used these notes as a starting point for the *Advanced Materials Book* in Part II course given at Cambridge on Cooling Theory and Cryogenics given by Professor John Kitchin, and the *Advanced Topics* given at Cambridge that on Subatomic Transitions given by Professor Tim Stace. I also included some more about other's PhD courses, Applied Maths for the Phys. Mathematics, the last version of the notes is based on their Physics course given by "Geoff Hand-Carter".

All credits by these notes are my fault.
